Superior Reliability

Nighthawk™
SERIES HLO PROJECTORS

The ideal choice for small to mid-sized venues requiring bright, high resolution images.

The SX4000D and XT4100 offer full-size image quality and reliability in a flexible design that is small in size, weight and price. Powered by a unique 3 chip .9-inch DLP system, the XT4100 and SX4000 feature a compact design that provides superior brightness and resolution. These 3,500 ANSI lumen HLO™ projectors feature native XGA resolution (XT4100) and native SXGA native resolution (SX4000) and can provide detailed and focused non-native resolution up to UXGA with Advanced AccuBlend technology.

The SX4000D and XT4100 incorporate a wide variety of inputs, giving them tremendous installation flexibility. And NEC's exclusive AutoSense Technology automatically synchronizes and adjusts the projector to optimize incoming computer and video signals, eliminating time-consuming manual adjustments. The SX4000 also offers an optional HD Serial Digital Interface (SDI) input card, allowing for a true digital interface with serial digital playback devices, resulting in the best possible image with no loss in quality.

The lens indexing feature helps save a significant amount of set up time by storing key lens positions in the projector's memory, while further reducing costs by utilizing XT5000 lenses.
