MT700 PROJECTOR

Pure big screen performance

The MT700 HDTV Home Cinema Projector from Toshiba is the perfect choice when only pure big screen performance will do. Its range of technology including High Definition support from a HDTV input and unique processing power ensure crisp, colour-correct images flow smoothly on display areas up to 7.62m in size.

PURE BIG SCREEN PERFORMANCE

The MT700 HDTV Home Cinema Projector brings pure big screen performance home for the entertainment purist to enjoy.

Its stunning presentation comes from a suite of technology including Superior DLP™ projection, native 16:9 wide-screen, and high 720p (1280 x 720 pixel) native resolution. And with an ultra-rapid six-segment colour wheel plus advanced Faroudja™ De-interlacer processor, it makes child play of converting interlaced images into smooth progressive ones with brilliant colour and deep blacks delivered on extremely large screens.

Other advanced features include manual white-balance and gamma correction, ultra-quiet 28dB operation, and four pre-set image modes, making the MT700 star of the big screen in any contemporary home.

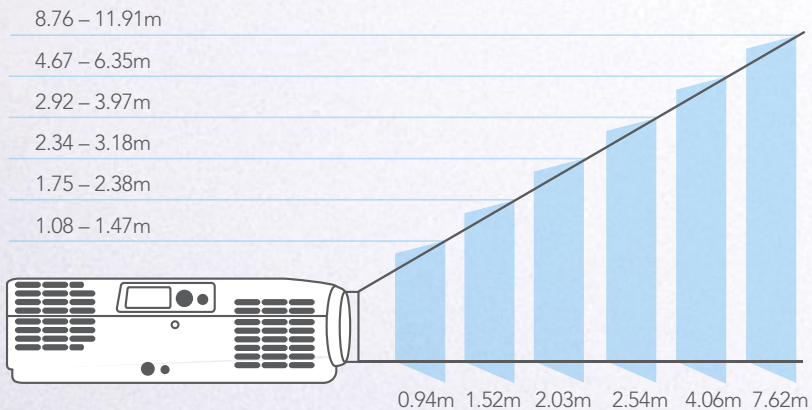

Peace of mind is also projected with a three year warranty and a complete 90 day product and lamp replacement period should a manufacturing fault arise.

KEY FEATURES

- Real 720p (WXGA) 1,280 x 720 pixel resolution for even larger displays
