

MultiSync® LT81™ and LT100™

The ultimate sales force
automation tool

Excellent image
quality and brightness

Outstanding ease of use plus
full-feature remote control

The ultra-portable MultiSync® LT Series projectors are the premier solution for making powerful presentations on the road.

Continuing the NEC Technologies legacy of outstanding image quality, ease of use and reliability, the new MultiSync LT Series single-chip DLP projectors are an ultra-portable solution for making powerful presentations. With exclusive NEC Technologies features, the MultiSync LT Series projectors stand out as the projectors of choice for sales force automation and mobile professionals:

- **Sales force automation** Featuring compact size and light weight, the MultiSync LT Series projectors are easy to take along wherever business takes you. They are easy to use, with simple plug and play setup and an intuitive remote control, so you don't have to fumble with complicated settings in front of your audience. And, NEC Technologies exclusive InstaCare™ 24 hour replacement guarantee means you won't be stranded without a projector should a problem arise.
- **Mobile training** Mobile training professionals will appreciate the high brightness offered by the MultiSync LT Series projectors. Images can be seen clearly even with room lights on, enabling note-taking and demonstrations. In addition, the projectors' excellent compatibility puts an arsenal of training tools at your fingertips, with easy connection to VCRs, DVD players, PC and Macintosh® computers and laptops, allowing you to switch seamlessly between sources for a continual flow of information.

Any mobile professional who needs to make a powerful impression will benefit from the features and performance of the MultiSync LT Series projectors.

Designed and equipped for true portability.

The MultiSync LT Series projectors are the ultra-portable projection solution for the professional on the go. They fit easily under the airplane seat

in front of you, so you can take them wherever business takes you, with no hassles. Their sturdy construction includes a convenient handle integrated into the unit. And, a padded carrying case is included to ensure that your investment is protected. Other optional cases are available to provide extra protection during travel or shipping. For added convenience, the MultiSync LT Series projectors offer an optional PC Card Viewer so you can store and transport your presentation on a PCMCIA card and leave your laptop behind.

High brightness and accurate, lifelike color.

The MultiSync LT Series projectors produce accurate, lifelike images using an entirely digital projection system. Texas Instruments single-chip DLP technology creates seamless images with a higher perceived resolution than that of other

projection technologies. And, its digital gray scale and color reproduction results in lifelike color images with exceptional accuracy.

Additional image enhancements offered on the MultiSync LT Series projectors include a 2X color wheel that reduces flicker. Plus, the 3-Line Digital Comb Filter, for composite video sources, provides better Y/C separation for sharp edges, improved detail and less video noise.

High-resolution images without loss of data.

Using NEC Technologies AccuBlend™ intelligent pixel blending technology, the MultiSync LT Series projectors deliver superior high-resolution images. Unlike competitive technologies that result in a significant loss of data, AccuBlend is an intelligent compression technology that blends and

	MultiSync LT81	MultiSync LT100

Smaller than a briefcase, the ultra-portable MultiSync LT Series projectors are a powerful solution for sales presentations.

Control your computer-based presentation and the projector with one easy-to-use wireless remote control (LT100 remote pictured)

Turns the projector on and off

Select your source with the touch of a button

Easily access and scroll-through the comprehensive on-screen menus

Right mouse click button (left click button on back)

Lets you reposition a magnified image

Allows you to magnify the image size up to 400%

Control the integrated laser pointer

The built-in mouse lets you control your computer and presentation, including launching the presentation and advancing slides

Turns off the image for a short period of time if you need to direct attention elsewhere

Lets you freeze your image for further audience clarification or emphasis

Adjust the projector's volume with one-touch ease

Enables you to forward and reverse your slide presentation when using the optional PC Card Viewer

remaps input data to match the available pixels on the DLP chip. Other technologies simply drop pixels or lines of information, resulting in a visible absence of information that can obscure important parts of your presentation.

Easy to use right out of the box. The MultiSync LT Series projectors are remarkably easy to use, eliminating the need for corporate training. Ease-of-use features include:

- **VGA cable** for simplified connection
- **On-screen controls** that allow fast and easy adjustments
- **Quick Connect Guide** that makes set-up a snap
- **Interactive CD-ROM** that provides a demonstration of key features

Total remote control simplifies set-up and use. The MultiSync LT Series projectors include a full-featured remote control with built-in laser pointer that enables quick, one-button access to important features. The remote control also provides access to helpful, intuitive on-screen controls that you can easily navigate using the integrated mouse. On-screen controls include:

- **Image adjustments** including brightness, color, contrast, sharpness and position.
- **Lamp timer** that displays how many hours the lamp has been used, helping you anticipate and manage maintenance of the projector.
- **Language select feature**, which allows you to select the language in which the on-screen menus appear.

Compatibility so broad, you just plug in and play. The MultiSync LT Series projectors offer quick and easy connection via a comprehensive input panel, which includes audio, computer,

video and S-Video inputs. The included VGA cable and Macintosh® multimode adapter enable you to simply plug in and play. And, because the cable is an industry standard, you can replace it easily if you forget it or lose it on the road.

The MultiSync LT Series projectors are compatible with most common video standards in use today including NTSC, PAL, SECAM and NTSC 4.43. They can display screen formats from sources such as DVD and laser disc players. Plus, their universal power supply enables global companies to use the same projector model throughout their organization.

Unbeatable peace of mind with an exclusive service warranty. NEC Technologies exclusive InstaCare™ service ensures you won't be stranded on the road with a projector that's not performing.

InstaCare guarantees a replacement projector within 24 hours or repairs to your original projector within 72 hours. NEC Technologies pays for and tracks shipping of your projector and any replacement projector via Federal Express. In addition to this convenient service, you'll have the peace of mind of knowing that your projector is backed by the responsive service and support of NEC Technologies.

The MultiSync LT Series projectors offer the ultimate in portability. An integrated handle makes the projectors easy and convenient to carry.

MultiSync LT Series Accessories

NEC Technologies offers a full line of accessories designed to complement your MultiSync LT Series projector.

LT TownCase

This durable case was designed for local transportation and safe storage. A front pocket provides additional safe storage for the remote control, plus any cables.

LT TownCase Plus

This case offers all of the features of the TownCase and the added convenience of a special pocket that safely stores your notebook computer.

LT AirCase

This sturdy shipping case features reinforced panels, wheels and is ATA-approved for shipping via land carrier or airline. A Federal Express-approved transparent pouch stores shipping labels for added convenience.

LT Mount

Sturdy, multiple-access ceiling mount features quick release capability for ease of transport, plus a built-in security feature.

Replacement Lamp

A user changeable metal halide lamp. NEC recommends replacement after 1000 hours of use.

Replacement Remote

Should your remote get lost or damaged, NEC offers an identical replacement remote.

PC Card Viewer

Store and transport your presentation on a PCMCIA card. One memory card included.

Component Video Cable

This optional cable can be used to display component video sources (DVD and laser disc players) connected to the RGB input of the projector for the highest video quality possible.

MultiSync LT81 and LT100 Specifications Model #LT81, LT100

DMD

LT81:	1-Chip DMD, 800 × 600 pixel
LT100:	1-Chip DMD, 1024 × 768 pixel

Lens

Both models:	1.3 times manual zoom, manual focus, F2.44 F=26-30mm
--------------	--

Lamp

Both models:	Metal halide lamp 280 Watt DC
--------------	-------------------------------

Image Size

Both models:	Min 24" (61cm), Max 300" (762cm)
--------------	----------------------------------

Projection Distance

Both models:	Min 3.9' (1.2m), Max 40.4' (12.3m)
--------------	------------------------------------

Light Output

LT81:	800 ANSI lumens, 1000 hour life
LT100:	1000 ANSI lumens, 1000 hour life

Contrast Ratio

Both models:	Greater than 250:1 ANSI 500:1 full on, full off
--------------	--

Color Reproduction

Both models:	16,777,216 colors simultaneously
--------------	----------------------------------

Color Temperature

LT81:	5600° Kelvin
LT100:	7000° Kelvin

Synchronization Range

LT81:	Horizontal: 15 to 60kHz (non-interlaced) Vertical: 50 to 85Hz
LT100:	Horizontal: 15 to 85kHz (non-interlaced) Vertical: 50 to 85Hz

RGB

Both models:	Input Signals: Visual: 75 ohm 0.7Vp-positive, Sync TTL Audio: 47k ohm 0.4V rms Input Terminals: Visual: 15pin to 15pin mini D sub cable Audio: Stereo Mini Jack Output Terminals: Visual: RGB Throughout Audio: Stereo Mini Jack
--------------	--

PC Compatibility

Both models:	640 × 480: 60, 72, 75 and 85Hz vertical refresh
Both models:	800 × 600: 56 to 75Hz vertical refresh
LT81:	1024 × 768: AccuBlend
LT100:	1024 × 768
LT100:	1280 × 1024: AccuBlend

Macintosh Compatibility

Both models:	640 × 480: 60 and 67Hz vertical refresh
LT81:	832 × 624: AccuBlend
LT100:	832 × 624

Video

Both models:	Input Signals: Visual: S-Video Y: 75 ohm .72Vp-p, C: 75 ohm 0.28Vp-p Audio: 47k ohm 0.4V rms Input Terminals: Visual: RCA Audio: RCA x 2 Horizontal Resolution: NTSC 550 lines PAL/SECAM/NTSC 4.43 350 lines
