The XL2 ColorView projector from Mitsubishi presents the new standard of excellence in portable presentation systems. With a lamp that shines up to 2500 hours, the XL2 is ideal for schools or offices that require extended performance levels. It is 1500 ANSI lumens bright and offers a native XGA resolution with 600 video lines. With the industry-leading three-year warranty including ERA (Express Replacement Assistance), it takes presentation systems to a whole new level of excellence.

- Exclusive, award-winning ColorView Natural Color Matrix for rich, vivid colors
- sRGB color profile technology ensures standard uniform color reproduction regardless of the type of display used
- 3D CineView™, Mitsubishi's proprietary video technology, significantly reduces flickering, artifacts, crawling, or blinking, with the image as sharp and smooth as its native film format
- Fully compatible with Mitsubishi's ProjectorView™ Networking system which enables a company's designated administrator and authorized users to remotely control, monitor, manage, and even diagnose a Mitsubishi projector
- Remarkable 2500 hours long lamp life for extended performance
- Versatile enough to support one computer and two video inputs simultaneously
- Three-year parts and labor warranty and 90-day warranty on the lamp (both warranties available in U.S. and Canada), toll-free technical support, plus three-year Express Replacement Assistance (ERA) program that guarantees free replacement product shipped overnight for next business day delivery when and where available

REVOLUTIONIZINGCOLOR™

COLORVIEW™ NATURAL COLOR MATRIX

The XL2 produces vivid colors that precisely match their real-life counterparts, as well as giving you the ability to precisely adjust color saturation and control color tones.

Without ColorView With ColorView

PRECISE COLOR REPRODUCTION WITH sRGB

Developed to ensure standard, uniform color reproduction regardless of the type of display used, sRGB color profile uses color coordinates common to all display technologies.

IRIS® (INTELLIGENT ROOM ILLUMINATION SENSOR)

Room illumination can have a significant effect on the quality and accuracy of color reproduction on-screen. The brighter the room, the duller the color. The XL2's built-in IRIS® automatically detects light volume and color density, automatically adjusting mid-range color tones as required for optimal color reproduction under any lighting conditions.

A change in external light makes the room brighter.
