

Micro Portable Multimedia LCD Projector

PLV-30

Specifications

Projector type	Micro Portable Multimedia LCD Projector
Screen size	Adjustable from 30 inch to 200 inch
Picture brightness	500 ANSI lumens
Contrast ratio	400:1
Horizontal resolution	500 TV lines
Throw distance	From 1.4 m to 8.0 m (100 inch at 4.0-4.8m)
Zoom ratio	1:1.2
LCD panel system	1.75cm (0.7") TFT active P-Si type x 3
Panel resolution	800 dots x 600 lines (SVGA)
Number of pixels	1,440,000 (480,000 x 3)
Projection system	X-type prism system
Projection lens	F2.0-2.3, f=28-33.6mm
Projection lamp	UHP 120W
Amplifier	Monaural, 1W rms
Speaker	One piece ...40 x 30mm
Keystone (U/D ratio)	12:1
Dimensions (W x H x W)	189 x 74.5 x 290 mm (not including adjustable feet)
Net weight	2.5kg
Rating power supply	100-120V AC, 200-240V AC, 50Hz/60Hz (Auto voltage selection)
Power consumption	200W
Scanning frequency	Automatic frequency control H sync.: 15kHz-80kHz, V sync.: 50Hz-100Hz Dot clock: Less than 100MHz
Color systems	PAL/SECAM/NTSC/NTSC4.43/PAL-M/PAL-N
Terminals	Computer input (HDB15) Computer audio input (Mini jack type) Computer service port Component input (video) (Y, Pb/Cb, Pr/Cr) S-Video input (DIN 4-pin type) AV audio input (Stereo mini jack type) Audio output (Stereo mini jack type)
Standard accessories	• Lens cover • Owner's manual • AC power supply cord • Wireless remote control unit • Video cable • Audio cable • S-Video cable • Dust cover

High image quality
DVD HDTV

Ultra mobile and easy to set up
B5 file size
ultra compact projector

Big-screen entertainment for the whole family

Movies for mom Sports for dad Computer games for the kids

**Home theater anytime,
anywhere you choose
B5 file size and only
2.5kg in weight**

Here at last is a home-theater projector you really can take anywhere in the house. You can set it up in the living room for a family home theater experience, or take it up to your room for mega-size video games - big-screen entertainment has never been more mobile.

**Super-quiet 38dBA
operation**

Linear control of fan rotation greatly reduces noise, so even quiet scenes and whispered dialog are not spoiled by fan noise.

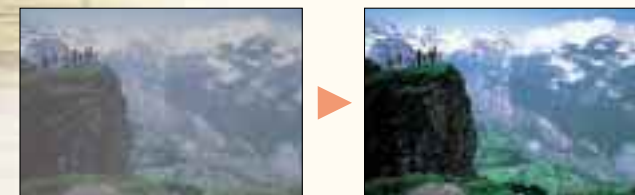

Digital Keystone Correction aids setup

If the projector is a long way above or below the projection screen, you can still enjoy a correct, rectangular image thanks to Digital Keystone Correction. Just press the button to adjust the picture (max. 15-degree differential).

High contrast to suit any picture

Brightness alone is not enough for projectors - in fact some give you a bright but washed-out picture. For realism, you also need contrast. SANYO's high-contrast optical system achieves an on-screen contrast ratio of 400 to 1. Put simply, that means the picture is dark where it should be dark and light where it should be light. This projector can really capture the atmosphere of spectacular scenery or a dark and moody movie scene. If you want to, you can also make fine manual adjustments with the Gamma Correction User Control.

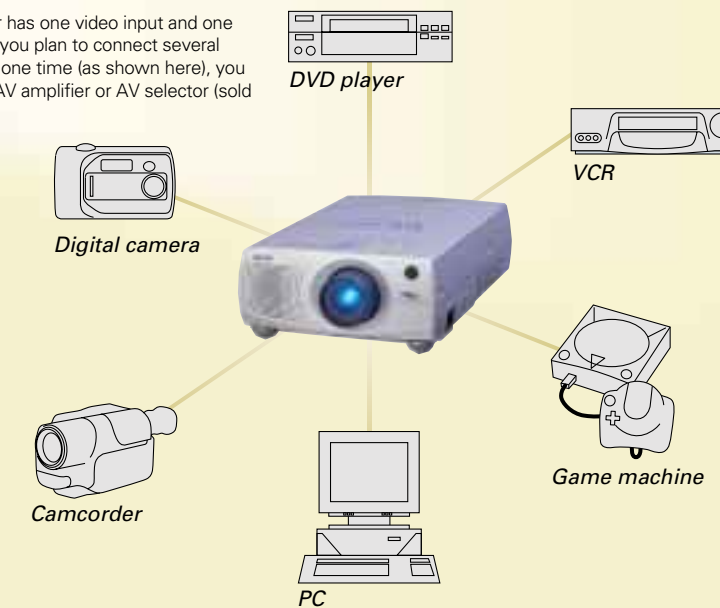

A true multi- source projector

Home theater is about more than just movies. The PLV-30 is a genuine multimedia projector, plug-and-play compatible with DVD players, VCRs, personal computers and other equipment.

*This projector has one video input and one RGB input. If you plan to connect several appliances at one time (as shown here), you will need an AV amplifier or AV selector (sold separately).

Superior DVD and HDTV projection

The PLV-30 offers component as well as conventional inputs options to suit all video sources. The newly developed Digital RGB Matrix IC input is directly compatible with DVD (Y/Cb/Cr) and high-definition TV (Y/Pb/Pr) output signals.

Multiple terminals

Digital RGB Matrix IC

Other features

- 1.2x manual zoom and focus for setup versatility
- 4:3 regular screen, 16:9 wide aspect selection (not possible with 1080i, 1035i, 720p input)
