

Panasonic®

LCD Projector Commercial Use

ENGLISH

Operating Instructions

Model No. **PT-LB60NTE**
PT-LB55NTE

WARNING:

- For permanently connected equipment, a readily accessible disconnect device shall be incorporated in the building installation wiring;
- For pluggable equipment, the socket-outlet shall be installed near the equipment and shall be easily accessible.

CAUTION:

To assure continued compliance, follow the attached installation instructions, which includes using the provided power cord and shielded interface cables when connecting to computer or peripheral device. If you use serial port to connect PC for external control of projector, you must use optional RS-232C serial interface cable with ferrite core. Any unauthorized changes or modifications to this equipment will void the user's authority to operate.

Information on Disposal for Users of Waste Electrical & Electronic Equipment (private households)

This symbol on the products and/or accompanying documents means that used electrical and electronic products should not be mixed with general household waste.

For proper treatment, recovery and recycling, please take these products to designated collection points, where they will be accepted on a free of charge basis. Alternatively, in some

countries you may be able to return your products to your local retailer upon the purchase of an equivalent new product.

Disposing of this product correctly will help to save valuable resources and prevent any potential negative effects on human health and the environment which could otherwise arise from inappropriate waste handling. Please contact your local authority for further details of your nearest designated collection point.

Penalties may be applicable for incorrect disposal of this waste, in accordance with national legislation.

For business users in the European Union

If you wish to discard electrical and electronic equipment, please contact your dealer or supplier for further information.

Information on Disposal in other Countries outside the European Union

This symbol is only valid in the European Union.

If you wish to discard this product, please contact your local authorities or dealer and ask for the correct method of disposal.

Precautions with regard to safety

WARNING

If you notice smoke, strange smells or noise coming from the projector, disconnect the mains plug from the mains socket.

- Do not continue to use the projector in such cases, otherwise fire or electric shocks could result.
- Check that no more smoke is coming out, and then contact an Authorised Service Centre for repairs.
- Do not attempt to repair the projector yourself, as this can be dangerous.

Do not install this projector in a place which is not strong enough to take the full weight of the projector.

- If the installation location is not strong enough, it may fall down or tip over, and severe injury or damage could result.

Installation work (such as ceiling suspension) should only be carried out by a qualified technician.

- If installation is not carried out correctly, there is the danger that injury or electric shocks may occur.

If foreign objects or water get inside the projector, or if the projector is dropped or the cabinet is broken, disconnect the mains plug from the mains socket.

- Continued use of the projector in this condition may result in fire or electric shocks.
- Contact an Authorised Service Centre for repairs.

Do not overload the mains socket.

- If the power supply is overloaded (for example, by using too many adapters), overheating may occur and fire may result.

Do not remove the cover or modify it in any way.

- High voltages can cause fire or electric shocks.
- For any inspection, adjustment and repair work, please contact an Authorised Service Centre.

Clean the mains plug regularly to prevent it from becoming covered in dust.

- If dust builds up on the mains plug, the resulting humidity can damage the insulation, which could result in fire. Pull the mains plug out from the mains socket and wipe it with a dry cloth.
- If not using the projector for an extended period of time, pull the mains plug out from the mains socket.

Do not do anything that might damage the mains lead or the mains plug.

- Do not damage the mains lead, make any modifications to it, place it near any hot objects, bend it excessively, twist it, pull it, place heavy objects on top of it or wrap it into a bundle.

- If the mains lead is used while damaged, electric shocks, short-circuits or fire may result.
- Ask an Authorised Service Centre to carry out any repairs to the mains lead that might be necessary.

Do not handle the mains plug with wet hands.

- Failure to observe this may result in electric shocks.

Insert the mains plug securely into the mains socket.

- If the plug is not inserted correctly, electric shocks or overheating could result.
- Do not use plugs which are damaged or mains sockets which are coming loose from the wall.

Do not place the projector on top of surfaces which are unstable.

- If the projector is placed on top of a surface which is sloped or unstable, it may fall down or tip over, and injury or damage could result.

Do not place the projector into water or let it become wet.

- Failure to observe this may result in fire or electric shocks.

Do not place the projector on soft materials such as carpets or sponge mats.

- Doing so may cause the projector to overheat, which can cause burns, fire or damage to the projector.

Do not place liquid containers on top of the projector.

- If water spills onto the projector or gets inside it, fire or electric shocks could result.
- If any water gets inside the projector, contact an Authorised Service Centre.

Do not insert any foreign objects into the projector.

- Do not insert any metal objects or flammable objects into the projector or drop them onto the projector, as doing so can result in fire or electric shocks.

Keep the batteries out of the reach of infants.

- If the batteries are swallowed, death by suffocation may result. If you believe that the batteries may have been swallowed, seek medical advice immediately.

Do not allow the + and - terminals of the batteries to come into contact with metallic objects such as necklaces or hairpins.

- Failure to observe this may cause the batteries to leak, overheat, explode or catch fire.
- Store the batteries in a plastic bag and keep them away from metallic objects.

During a thunderstorm, do not touch the projector or the cable.

- Electric shocks can result.

Do not use the projector in a bath or shower.

- Fire or electric shocks can result.

Do not look into the lens while the projector is being used.

- Strong light is emitted from the projector's lens. If you look directly into this light, it can hurt and damage your eyes.
- Be especially careful not to let young children look into the lens. In addition, disconnect the mains plug when you are away from the projector.

Do not place your skin into the light beam while the projector is being used.

- Strong light is emitted from the projector's lens. If you place directly into this light, it can hurt or damage your skin.

Do not place your hands or other objects close to the air outlet port.

- Heated air comes out of the air outlet port. Do not place your hands or face, or objects which cannot withstand heat close to this port [allow at least 15 cm (6") of space], otherwise burns or damage could result.

Replacement of the lamp should only be carried out by a qualified technician.

- The lamp has high internal pressure. If improperly handled, explosion might result.
- The lamp can easily become damaged if struck against hard objects or dropped, and injury or malfunctions may result.

When replacing the lamp, allow it to cool for at least one hour before handling it.

- The lamp cover gets very hot, and touching it can cause burns.

Before replacing the lamp, be sure to disconnect the mains plug from the mains socket.

- Electric shocks or explosions can result if this is not done.

Caution

Do not cover the air inlet port or the air outlet port.

- Doing so may cause the projector to overheat, which can cause fire or damage to the projector.
- Do not place the projector in narrow, badly ventilated places such as closets or bookshelves.
- Do not place the projector on cloth or papers, as these materials could be drawn into the air inlet port.

Do not set up the projector in humid or dusty places or in places where the projector may come into contact with smoke or steam.

- Using the projector under such conditions may result in fire or electric shocks.

When disconnecting the mains lead, hold the plug, not the lead.

- If the mains lead itself is pulled, the lead will become damaged, and fire, short-circuits or serious electric shocks may result.

Always disconnect all cables before moving the projector.

- Moving the projector with cables still attached can damage the cables, which could cause fire or electric shocks to occur.

Do not place any heavy objects on top of the projector.

- Failure to observe this may cause the projector to become unbalanced and fall, which could result in damage or injury.

Do not short-circuit, heat or disassemble the batteries or place them into water or fire.

- Failure to observe this may cause the batteries to overheat, leak, explode or catch fire, and burns or other injury may result.

When inserting the batteries, make sure the polarities (+ and -) are correct.

- If the batteries are inserted incorrectly, they may explode or leak, and fire, injury or contamination of the battery compartment and surrounding area may result.

Use only the specified batteries.

- If incorrect batteries are used, they may explode or leak, and fire, injury or contamination of the battery compartment and surrounding area may result.

Do not mix old and new batteries.

- If the batteries are inserted incorrectly, they may explode or leak, and fire, injury or contamination of the battery compartment and surrounding area may result.

Do not put your weight on this projector.

- You could fall or the projector could break, and injury may result.
- Be especially careful not to let young children stand or sit on the projector.

If not using the projector for an extended period of time, disconnect the mains plug from the mains socket.

- If dust builds up on the mains plug, the resulting humidity may damage the insulation, which could result in fire.
- This projector continues to draw approximately 3 W of power even when the power is turned off.

Disconnect the mains plug from the mains socket as a safety precaution before carrying out any cleaning.

- Electric shocks can result if this is not done.

If the lamp has broken, ventilate the room immediately. Do not touch or bring your face close to the broken pieces.

- Failure to observe this may cause the user to absorb the gas which was released when the lamp broke and which contains nearly the same amount of mercury as fluorescent lamps, and the broken pieces may cause injury.
- If you believe that you have absorbed the gas or that the gas has got into your eyes or mouth, seek medical advice immediately.
- Ask your dealer to replace the lamp unit and check the inside of the projector.

Ask an Authorised Service Centre to clean inside the projector at least once a year.

- If dust is left to build up inside the projector without being cleaned out, it can result in fire or problems with operation.
- It is a good idea to clean the inside of the projector before the season for humid weather arrives. Ask your nearest Authorised Service Centre to clean the projector when required. Please discuss with the Authorised Service Centre regarding cleaning costs.

We are constantly making efforts to preserve and maintain a clean environment. Please take non repairable units back to your dealer or a recycling company.

Accessories

Check that all of the accessories shown below have been included with your projector.

<p>Card remote control unit (N2QAYA000001 x1)</p> 	<p>AAA batteries for remote control unit (x2)</p> 	
<p>Mains lead (K2CM3DR00002 x 1)</p> 	<p>Carrying bag (TPEP019 x 1)</p> 	<p>CD-ROM (TQBH9008 x1)</p> 
<p>RGB signal cable [1.8 m (5'10"), K1HA15DA0002 x1]</p> 		

Before use

Caution when moving the projector

Be sure to attach the lens cover before moving the projector.

The projection lens is extremely susceptible to vibration and shocks. When moving the projector, use the accessory carrying bag. When placing the projector inside the carrying bag, position it so that the lens is facing upward. Do not place the projector with its adjustable legs extended and do not put anything else in the bag other than the projector, cables and the remote control unit.

Cautions regarding setup

Avoid setting up in places which are subject to vibration or shocks.

The internal parts can be damaged, which may cause malfunctions or accidents.

Avoid setting up in places which are subject to sudden temperature changes, such as near an air conditioner.

The life of the lamp may be shortened.

Do not set up the projector near high-voltage power lines or near motors.

The projector may be subject to electromagnetic interference.

If installing the projector to the ceiling, ask a qualified technician to carry out all installation work.

You will need to purchase the separate installation kit (Model No.ET-PKB30). Furthermore, all installation work should only be carried out by a qualified technician.

If using this projector at high elevations (above 1 400 m), set the "HIGHLAND" to "ON". (Refer to page 52.)

Failure to observe this may result in malfunctions.

Notes on use

In order to get the best picture quality

Draw curtains or blinds over any windows and turn off any lights near the screen to prevent outside light or light from indoor lamps from shining onto the screen.

Do not touch the surfaces of the lens with your bare hands.

If the surface of the lens becomes dirty from fingerprints or anything else, this will be magnified and projected onto the screen. Moreover, when not using the projector, retract the lens and then cover it with the lens cover.

Screen

Do not apply any volatile substances which may cause discolouration to the screen, and do not let it become dirty or damaged.

Lamp

The lamp may need to be replaced earlier due to variables such as individual lamp characteristics, usage conditions and the installation environment, especially when the projector is subjected to continuous use for more than 10 hours or the power is frequently turned on and off.

Liquid crystal panel

The liquid crystal panel of the projector is built with very high precision technology to provide fine picture details. Occasionally, a few non-active pixels may appear on the screen as fixed points of blue, green or red. Please note that this does not affect the performance of your LCD.

Location and function of each part

① **Projector control panel** (page 14)

② **Zoom ring** (page 27)

③ **Focus ring** (page 27)

④ **Security lock**

This can be used to connect a commercially-available theft-prevention cable (manufactured by Kensington). This security lock is compatible with the Microsaver Security System from Kensington.

⑤ **Leg adjuster buttons (L/R)** (page 27)

These buttons are used to unlock the front adjustable legs. Press to adjust the angle of tilt of the projector.

⑥ **Lens cover**

⑦ **Projection lens**

⑧ **Remote control signal receptor** (page 24)

- ① **Connector panel** (page 16)
- ② **Air outlet port**
Do not cover this port.
- ③ **Speaker**
- ④ **Front adjustable legs (L/R)** (page 27)
- ⑤ **Air inlet port, Air filter** (page 59)
Do not cover this port.
- ⑥ **Lamp unit cover** (page 60)

NOTE:

- During projection of an image, the cooling fan will operate, emitting a small noise as it operates. This noise may change depending on the ambient temperature. Turning the lamp on or off will cause this noise to increase a little.
- By using the “OPTION” menu to set “LAMP POWER” to “ECO-MODE”, the operating sound of the fan can be reduced. (Refer to page 50.)

WARNING

Do not place your hands or other objects close to the air outlet port.

- Heated air comes out of the air outlet port. Do not place your hands or face, or objects which cannot withstand heat close to this port [allow at least 15 cm (6”) of space], otherwise burns or damage could result.

Projector control panel

Menu operation

<on connector panel:page 16>

Remote control unit

① PC INPUT indicator

This indicator illuminates when a signal is being input to the connector (PC 1 IN or PC 2 IN) selected using the input select buttons.

- ② **LAMP indicator** (page 58)
This indicator illuminates when it is time to replace the lamp unit. It flashes if a circuit abnormality is detected.
- ③ **TEMP indicator** (page 57)
This indicator illuminates if an abnormally high temperature is detected inside the projector or around it. If the temperature rises above a certain level, the power supply will be turned off automatically and the indicator will flash.
- ④ **Illumination sensor** (page 42)
This sensor detects the luminance when the “DAYLIGHT VIEW” function is operating. Do not cover the projector and do not place any object on the projector when using it.
- ⑤ **POWER button** (pages 26, 28 and 29)
This button is used to turn the power on and off. This button on the projector illuminates red when the projector is in standby mode, and it illuminates green when a picture starts to be projected.
- ⑥ **INPUT SELECT button** (pages 27 and 30)
This button is used to switch the input signals from the connected equipment.
- ⑦ **AUTO SETUP button** (pages 27 and 31)
If this button is pressed while a RGB signal is being projected, the position of the image and the settings for “DOT CLOCK” and “CLOCK PHASE” will be adjusted automatically.
- ⑧ **MENU button** (pages 36 and 38)
This button is used to display the menu screen. When a menu screen is being displayed, this button can be used to return to a previous screen or to clear the screen.
- ⑨ **Arrow (▲▼◀ and ▶) buttons** (page 38)
These buttons are used to select and adjust items in the on-screen menus.
- ⑩ **ENTER button** (page 38)
This button is used to accept and to activate items selected in the on-screen menus.
- ⑪ **POINTER button** (page 35)
This button is used to display a pointer on the projected images.
- ⑫ **PAGE buttons**
These buttons are used when the projector is controlled by means of a wireless network. Refer to the accessory CD-ROM for details.
- ⑬ **INDEX WINDOW button** (page 34)
This button can be used to split the image projection area into a still picture and a moving picture. You can also select this function from the on-screen menu (refer to page 53).
- ⑭ **MULTI-LIVE SELECT button**
This button is used when the projector is controlled by means of a wireless network. Refer to the accessory CD-ROM for details.

(continued on next page)

(continued from previous page)

⑮ **DIRECT INPUT SELECT buttons** (pages 27 and 30)

You can select the input signal directly by pushing these buttons.

⑯ **SHUTTER button** (page 32)

This button is used to momentarily turn off the picture and sound. You can also select this function from the on-screen menu (refer to page 53).

⑰ **DEFAULT button** (page 39)

This button is used to reset the projector adjustment values to the factory default settings.

⑱ **VOLUME +/- buttons** (page 32)

These buttons are used to adjust the volume of the sound that is output from the projector's built-in speaker and VARIABLE AUDIO OUT connector. Refer to page 52 for details on how to adjust the volume without using the remote control unit.

⑲ **DIGITAL ZOOM +/- buttons** (page 33)

These buttons are used to enlarge the projected image.

① **SERIAL connector** (pages 21, 22, 23 and 70)

This connector is used to connect a personal computer to the projector in order to control the projector externally. (RS-232C compatible)

② **PC 1 IN connector** (pages 21 and 22)

This connector is used to input RGB signals and YPbPr signals.

- ③ **PC 2 IN/PC 1 OUT connector** (pages 21, 22 and 50)
This connector is used to input or output RGB signals and YPBPR signals. Adjust "PC2 SELECT" in the "OPTION" menu to select whether you want input or output with this connector.
- ④ **S-VIDEO IN connector** (pages 23 and 46)
This connector is used to input signals from S-VIDEO-compatible equipment such as a DVD player. The connector is S1 signal compatible, and it automatically switches between 16:9 and 4:3 aspect ratios in accordance with the type of signal being input.
- ⑤ **AUDIO IN L-R connectors (for S-VIDEO/VIDEO)** (page 23)
- ⑥ **Menu operation** (page 14)
- ⑦ **VIDEO IN connector** (page 23)
This connector is used to input video signals from video equipment such as a video deck.
- ⑧ **VARIABLE AUDIO OUT connector** (pages 21, 22, and 23)
This connector is used to output the audio signals which are input to the projector. If audio equipment is connected to this connector, no sound will be output from the built-in speakers.
- ⑨ **PC 1/2 AUDIO IN connectors** (pages 21 and 22)
These connectors are used to input audio signals, and they correspond to the PC 1 IN/PC 2 IN connectors respectively.
- ⑩ **Power input socket (AC IN)** (page 26)
The accessory mains lead is connected here.
Do not use any mains lead other than the accessory mains lead.

Setting-up

Projection methods

In way of installing projector, any one of the following four projection methods are used. Select whichever projection method matches the setting-up method. (The projection method can be set from the “OPTION” menu. Refer to page 52 for details.)

- Front-desk projection

Menu item	Setting
INSTALLATION	FRONT/DESK

- Front-ceiling projection

Menu item	Setting
INSTALLATION	FRONT/CEILING

- Rear-desk projection
(Using a translucent screen)

Menu item	Setting
INSTALLATION	REAR/DESK

- Rear-ceiling projection
(Using a translucent screen)

Menu item	Setting
INSTALLATION	REAR/CEILING

NOTE:

- You will need to purchase the separate ceiling bracket (ET-PKB30) when using the ceiling installation method.
- Do not set up the projector vertically or tilted horizontally, otherwise it may cause damage to the projector.
- Do not set up the projector in a place that is tilted at more than $\pm 30^\circ$ vertically. Setting up the projector in places that are tilted at more than $\pm 30^\circ$ vertically may shorten component life.

Projector position

- L: Projection distance
- SH: Image height
- SW: Image width
- H1: Distance from centre of lens to bottom edge of projected image

Getting started

Projection distances

PT-LB60NTE

4:3 Screen size (diagonal)	Projection distance (L)		Height position (H1)
	Wide (LW)	Telephoto (LT)	
0.84 m(33")	—	1.1 m(3'7")	0.07 m(2-3/4")
1.02 m(40")	1.2 m(3'11")	1.4 m(4'7")	0.08 m(3-1/8")
1.27 m(50")	1.5 m(4'11")	1.7 m(5'6")	0.11 m(4-5/16")
1.52 m(60")	1.8 m(5'10")	2.1 m(6'10")	0.13 m(5-3/32")
1.78 m(70")	2.1 m(6'10")	2.5 m(8'2")	0.15 m(5-7/8")
2.03 m(80")	2.4 m(7'10")	2.8 m(9'2")	0.17 m(6-11/16")
2.29 m(90")	2.7 m(8'10")	3.2 m(10'5")	0.19 m(7-15/32")
2.54 m(100")	3.0 m(9'10")	3.5 m(11'5")	0.21 m(8-1/4")
3.05 m(120")	3.6 m(11'9")	4.3 m(14'1")	0.25 m(9-13/16")
3.81 m(150")	4.6 m(15'1")	5.4 m(17'8")	0.32 m(12-19/32")
5.08 m(200")	6.1 m(20")	7.2 m(23'7")	0.42 m(16-17/32")
6.35 m(250")	7.6 m(24'11")	9.0 m(29'6")	0.53 m(20-27/32")
7.62 m(300")	9.1 m(29'10")	10.8 m(35'5")	0.63 m(24-25/32")

PT-LB55NTE

4:3 Screen size (diagonal)	Projection distance (L)		Height position (H1)
	Wide (LW)	Telephoto (LT)	
0.84 m(33")	—	1.2 m(3'11")	0.05 m(1-15/16")
1.02 m(40")	1.4 m(4'7")	1.5 m(4'11")	0.06 m(2-11/32")
1.27 m(50")	1.7 m(5'6")	1.9 m(6'2")	0.07 m(2-3/4")
1.52 m(60")	2.0 m(6'6")	2.3 m(7'6")	0.09 m(3-17/32")
1.78 m(70")	2.4 m(7'10")	2.7 m(8'10")	0.10 m(3-29/32")
2.03 m(80")	2.7 m(8'10")	3.1 m(10'2")	0.12 m(4-23/32")
2.29 m(90")	3.0 m(9'10")	3.5 m(11'5")	0.13 m(5-3/32")
2.54 m(100")	3.4 m(11'1")	4.0 m(13'1")	0.15 m(5-7/8")
3.05 m(120")	4.1 m(13'5")	4.8 m(15'8")	0.18 m(7-1/16")
3.81 m(150")	5.1 m(16'8")	6.0 m(19'8")	0.22 m(8-21/32")
5.08 m(200")	6.8 m(22'3")	8.0 m(26'2")	0.30 m(11-25/32")
6.35 m(250")	8.4 m(27'6")	10.0 m(32'9")	0.37 m(14-9/16")
7.62 m(300")	10.1 m(33'1")	12.0 m(39'4")	0.44 m(17-5/16")

NOTE:

- The dimensions in the table above are approximate.
- For details about projected image distances, refer to page 67.

Connections

Notes on connections

- Read the instruction manual for each peripheral device carefully before connecting it.
- Turn off the power supply for all peripheral devices before making any connections.
- If the cables necessary for connection are not included with the peripheral device or available as an option, you may need to prepare a proper cable for the device concerned.
- If there is a lot of jitter in the video signal, the projected image may flicker. In such cases, it will be necessary to connect a TBC (time base corrector).
- Refer to the list on page 68 for details on compatible signals which can be input to the projector.
- Only one audio system circuit is available for the AUDIO IN L-R connectors, so if you change the audio input source, you will need to remove and insert the appropriate plugs.

Connecting to computer

Refer to the accessory CD-ROM for details on the wireless network that can be used for controlling the projector with a personal computer.

Connecting to video equipment (1)

NOTE:

- Do not input the signal to the PC 2 IN/PC 1 OUT connector when “PC2 SELECT” in the “OPTION” menu is set to “OUTPUT”. (page 50)
- If the signal cables are disconnected or if the power supply for the computer or video deck is turned off while “DIGITAL ZOOM” or “INDEX WINDOW” is being used, these functions will be cancelled. (pages 33 and 34)

Connecting to video equipment (2)

Computer for control use

Serial adapter
(ET-ADSER :
sold separately)
DIN 8-pin
(male)

DVD player

Audio system

Video deck

Preparation for the remote control unit

- ① While pressing the tab, lift the battery cover to remove it.

- ② Insert the batteries into the battery holder so that the polarities are correct.

AAA batteries (two)

- ③ Replace the battery cover (a click will be heard).

NOTE:

- Do not drop the remote control unit.
- Keep the remote control unit away from liquids.
- Remove the batteries if not using the remote control unit for long periods.
- Do not use rechargeable batteries.
- If the remote control unit is held so that it is facing directly in front of the remote control signal receptor, the operating range is within approximately 7 m (23') from the surfaces of the receptor. Furthermore, the remote control unit can be operated from an angle of $\pm 30^\circ$ to the left or right and $\pm 15^\circ$ above or below the receptor.
- If the buttons on the remote control unit are kept pressed, the battery power will be consumed rapidly.
- If there are any obstacles in between the remote control unit and the receptor, the remote control unit may not operate correctly.
- If strong light is allowed to shine onto the remote control signal receptor, correct projector operation may not be possible. Place the projector as far away from light sources as possible.
- If facing the remote control unit toward the screen to operate the projector, the operating range of the remote control unit will be limited by the amount of light reflection loss caused by the characteristics of the screen used.

Turning on the power

Before turning on the power

1. Ensure that all peripheral devices are connected properly.
2. Remove the lens cover.

1 Connect the accessory mains lead to the AC IN socket.

- Insert the connector into the AC IN socket so that the shape of the connector matches the shape of the socket. Then insert the mains plug into the mains socket.
- The POWER button on the projector will illuminate red.

2 Press the POWER button.

- The POWER button on the projector will flash green. After a short period, it will illuminate green, and the startup logo will be displayed. If you would like the startup logo not to be displayed, set "STARTUP LOGO" to "OFF". (Refer to page 49.)

3 Turn on the power of all connected devices.

- Start the play function of a device such as a DVD player.

NOTE:

- A tinkling sound may be heard when the lamp unit is turned on, but this is not a sign of a malfunction.

4 Select the input signal by pressing the INPUT SELECT button or the DIRECT INPUT SELECT buttons.

- A picture will be projected in accordance with the selected input signal. (page 30)
- When "SIGNAL SEARCH" is set to "ON", the projector detects which signals are being input, and uses these signals for projection.
- If no signal is detected, the guide screen for computer connection will be displayed (when "INPUT GUIDE" in the "OPTION" menu is set to "DETAILED". Refer to page 69 for details).
- Press the INPUT SELECT button to finish the input signal search.

Direct power on function

If "DIRECT POWER ON" in the "OPTION" menu is set to "ON", projection will start after the mains lead is connected. Refer to page 51 for details.

Follow the procedure below when you set the projector up first, and when you change the placement after original setup.

5 Adjusting the angle

- Place the projector so that it is vertical to the screen.
- While pressing the adjuster buttons, adjust the forward/back angle of tilt of the projector. Adjust so that the projected image is placed at the centre of the screen.

6 Press the AUTO SETUP button (when RGB signals are being input).

- Settings such as the position of the image will be corrected automatically. (page 31)

7 Adjusting the size

- Turn the zoom ring to adjust the size of the projected image.

8 Adjusting the focus

- Turn the focus ring to adjust the focus of the projected image.

Turning off the power

1 Press the POWER button.

- The “POWER OFF” confirmation screen will be displayed.

2 Press the POWER button again.

- The lamp unit will switch off and the picture will stop being projected.
(The POWER button on the projector will illuminate orange while the cooling fan is still operating.)

NOTE:

- Press any button other than the POWER button to cancel the “POWER OFF” screen.
- The “POWER OFF” screen will disappear in 10 seconds.

3 Disconnect the mains lead after the POWER button on the projector illuminates red.

- Disconnect the mains plug from the mains socket first, and then disconnect the connector from the AC IN socket.

NOTE:

- You can also turn off the power by holding down the POWER button for more than 0.5 seconds.

Direct power off function

You can disconnect the mains lead during projection or immediately after use and move the projector. The cooling fan will operate by the internal power supply to cool down the lamp.

- When this function is used, it may take more time for the lamp to turn back on again compared to when the lamp cools down with the mains lead connected.
- Do not put the projector in a bag while the POWER button on the projector is illuminated.

CAUTION

If not using the projector for an extended period of time, disconnect the mains plug from the mains socket.

- If dust builds up on the mains plug, the resulting humidity may damage the insulation, which could result in fire.
- This projector continues to draw approximately 3 W of power even when the power is turned off.

POWER button on the projector

POWER button status		Projector status
Red	Illuminated	The projector is in standby mode and image projection is possible by pressing the POWER button.
Green	Flashing	The projector is preparing for projection after the power has been turned on while the POWER button on the projector is illuminated red. (After a short period, a picture will be projected.)
	Illuminated	A picture is being projected.
Orange	Illuminated	The lamp is cooling down after the power has been turned off or while direct power off function is operating.
	Flashing	The projector is preparing for projection after the power has been turned on while the POWER button on the projector is illuminated orange. (After a short period, a picture will be projected.)

Selecting the input signal (INPUT SELECT/ DIRECT INPUT SELECT)

You can select the input signal by pressing the INPUT SELECT button or the DIRECT INPUT SELECT buttons.

Projector control panel

Press the INPUT SELECT button.

- The input signal selected will change as shown below each time the INPUT SELECT button is pressed.

INPUT SELECT button		Changing signals
Control panel	INPUT SELECT	<pre> graph LR WIRELESS --> PC1 PC1 --> PC2 PC2 --> S-VIDEO S-VIDEO --> VIDEO VIDEO --> WIRELESS </pre>
Remote control unit	INPUT SELECT	

Press the DIRECT INPUT SELECT buttons.

- You can select the input signal directly.

DIRECT INPUT SELECT buttons		Changing signals
Remote control unit		The signal that is being input to the PC 1 IN connector will be projected.
		The signal that is being input to the PC 2 IN connector will be projected.
		The signal that is being input to the S-VIDEO IN connector will be projected.
		The signal that is being input to the VIDEO IN connector will be projected.
		The signal that is set by the wireless network will be projected. (page 56)

NOTE:

- “PC2” cannot be selected when “PC2 SELECT” in the “OPTION” menu is set to “OUTPUT”.

Correcting the image position automatically (AUTO SETUP)

This projector can adjust the position of the image and the settings for “DOT CLOCK” and “CLOCK PHASE” when RGB signals are being input.

Projector control panel

Press the **AUTO SETUP** button while RGB signals are being projected.

- Automatic positioning will be carried out.

NOTE:

- “SIGNAL SEARCH” will also be carried out. (When “SIGNAL SEARCH” is set to “ON”, refer to page 51 for details.)
- If the dot clock frequency is 100 MHz or higher, “DOT CLOCK”, and “CLOCK PHASE” will not be adjusted automatically. Refer to page 45 for details.
- If the edges of the projected image are indistinct, or if a dark picture is being projected, the automatic setup processing may stop automatically before it is complete. If this happens, project a different picture and then press the AUTO SETUP button again.

Turning off the picture and sound momentarily (SHUTTER)

The “SHUTTER” function can be used to momentarily turn off the picture and sound from the projector when the projector is not being used for short periods of time, such as during breaks in meetings or when carrying out preparation. The projector uses less power in “SHUTTER” mode than it does in normal projection mode.

Press the SHUTTER button.

- The picture and sound will be turned off.
- Press any button on either the projector or remote control unit to return to normal operating mode.

NOTE:

- You can also select “SHUTTER” from the on-screen menu (refer to page 53).

Adjusting the volume (VOLUME)

You can adjust the volume of the sound that is output from the projector’s built-in speaker and VARIABLE AUDIO OUT connector.

Press the VOLUME +/- button.

- Press the + button to raise the volume.
- Press the - button to lower the volume.

NOTE:

- You can also select “VOLUME” from the on-screen menu (refer to page 52).

Enlarging the picture (DIGITAL ZOOM)

You can enlarge the projected image and move the enlarged area.

Press the DIGITAL ZOOM +/- button.

- The picture will then be enlarged to 1.5 times the normal size.
- Press the MENU button to return to the normal screen.

Menu operation
(on connector panel)

Button functions when using “DIGITAL ZOOM”

+ button The enlargement ratio will increase.

- button The enlargement ratio will decrease.

▲▼ buttons The displayed position will move upward or downward.

◀▶ buttons The displayed position will move to the left or right.

NOTE:

- The enlargement ratio can be changed within the range of 1x to 2x, in steps of 0.1. When RGB signals are being input, the enlargement ratio can be changed within the range of 1x to 3x, except when the “FRAME LOCK” is set to “ON” (page 47).
- If the type of signal being input changes while the digital zoom function is being used, the digital zoom function will be cancelled.

Displaying two screens (INDEX WINDOW)

This function lets you store a picture which is being projected into memory, so that you can display a still picture and a moving picture on the screen.

Menu operation
(on connector panel)

Press the INDEX WINDOW button.

- The current moving picture will be captured in a still window.
- Press the MENU button to return to the previous screen.

Button functions when using “INDEX WINDOW”

Press the ▲ or ▼ button to select a screen size.

It can switch to three stages.

Press the ◀ or ▶ button to switch between the still picture screen and moving picture screen.

Press the ENTER button to capture the present moving picture in a still window.

NOTE:

- The aspect ratio of the screen changes and the image is vertically elongated in comparison to a normal image.
- When the screen size is changed, the picture's aspect ratio will also change. Make sure that you fully understand the notes on “ASPECT” on page 47 before using the “INDEX WINDOW” function.
- You can also select “INDEX WINDOW” from the on-screen menu (refer to page 53).

Displaying the pointer (POINTER)

You can display the pointer on the projected images.

Menu operation
(on connector panel)

Press the POINTER button.

- A pointer will be displayed in the middle of the projected image.
- Press the POINTER button to cancel the pointer display.

Moving the pointer

Press the ▲▼◀▶ buttons to move the pointer.

<Remote control unit>

The pointer will move in 8 directions as shown below.

<Projector control panel>

The pointer will move in 4 directions as shown below.

You can select the pointer in "POINTER SELECT" from 3 types (refer to page 50).

Pointer1

Pointer2

Pointer3

NOTE:

- The pointer cannot be displayed when a menu screen is being displayed.

On-screen menus

Menu screens

The various settings and adjustments for this projector can be carried out by selecting the operations from on-screen menus.

The general arrangement of these menus is shown below.

Menu Screen

(When a VIDEO signal is being input)

- Press the MENU button to display the menu screen. Refer to page 38 for details on how to operate the on-screen menus.
- The illustrations of the on-screen menus in this operating instructions are for the PT-LB60NTE.

PICTURE menu (page 40)

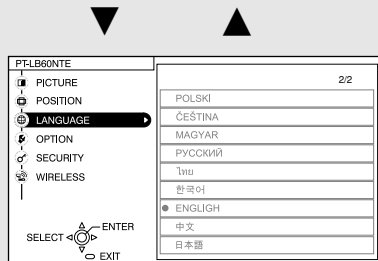

POSITION menu (page 44)

LANGUAGE menu (page 48)

SECURITY menu (page 54)

WIRELESS menu (page 56)

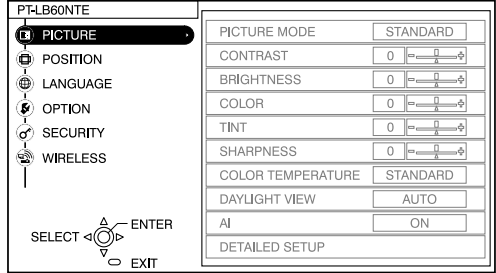

OPTION menu (page 49)

Menu operation guide

① Press the MENU button.

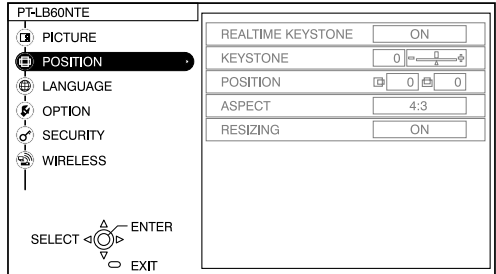

The menu screen will be displayed.

Menu operation
(on connector panel)

② Press the ▲ or ▼ button to select an item from the main menu on the left side.

The selected item will be displayed in orange.

The sub-menu for the selected item will be displayed on the right side.

③ Press the ENTER button.

You can select an item from the sub-menu.

NOTE:

- Press the MENU button to return to the previous screen.

- ④ Press the ▲ or ▼ button to select an item, and then press the ◀ or ▶ button to adjust the value or change the setting.

If adjusting the items in the “PICTURE” and “POSITION” menus, the menu screen will disappear and only the selected item will be displayed.

The value and setting indicator will turn green when any adjustment changes from the factory set value. For items without any selective setting or bar scale, press the ENTER button. The next screen for the item will then be displayed.

Unavailable on-screen menu items

This projector has unadjustable items and unusable functions depending on the signal being input.

If an item cannot be adjusted or a function cannot be used, you cannot select the corresponding item.

Returning a setting to the factory default

If you press the DEFAULT button on the remote control unit, you can return settings to the factory default settings. However, the operation of this function varies depending on which screen is being displayed.

● When a menu screen is being displayed

All the items on the sub-menu which is being displayed will be returned to their factory default settings, and the value and setting indicator will appear white.

● When an individual adjustment screen is being displayed

Only the item displayed will be returned to the factory default setting, and the value and setting indicator will appear white.

NOTE:

- A triangle symbol below a bar scale indicates the factory default setting. Items which do not have this triangle symbol cannot be returned to the factory default setting. The positions of the triangle symbols vary depending on the type of signal being input.

Indicates the current adjustment value

Indicates the standard factory default setting

Adjusting the picture

- ① Press the **MENU** button to display the menu screen.
- ② Select the **“PICTURE”** menu from the main menu, and then press the **ENTER** button.
- ③ Press the **▲** or **▼** button to select an item.
- ④ Press the **◀** or **▶** button to adjust the value or change the setting. For items with selective setting or a bar scale, the individual adjustment screen will be displayed. For **“DETAILED SETUP”**, press the **ENTER** button to display the next screen.

When an S-VIDEO/VIDEO signal is being input

PICTURE MODE

When an S-VIDEO/VIDEO/YPbPr signal is being input

When an RGB signal is being input or WIRELESS is selected

Select the picture mode that best matches the image source and room conditions.

The mode best used in dark rooms is "NATURAL". For rooms having regular lighting conditions in use, select "STANDARD". For exceptionally bright rooms, use "DYNAMIC".

"BLACKBOARD" is available only when "BLACKBOARD" in the "OPTION" menu is set to "ON". Select "BLACKBOARD" when projecting onto blackboards.

CONTRAST

This adjusts the contrast of the picture. (Adjust the "BRIGHTNESS" setting first if required before adjusting the "CONTRAST" setting.)

The picture is bright: ◀ button

The picture is dark: ▶ button

BRIGHTNESS

This adjusts the darker areas (black areas) in the picture.

Black areas are too light: ◀ button

Dark areas are too solid: ▶ button

COLOR

(S-VIDEO/VIDEO/YPbPr only)

The colour is too deep: ◀ button

The colour is too pale: ▶ button

TINT

(NTSC/NTSC 4.43/YPbPr only)

This adjusts the flesh tones in the picture.

The flesh tones are greenish:

◀ button

The flesh tones are reddish:

▶ button

SHARPNESS

To soften the picture details:

◀ button

To sharpen the picture details:

▶ button

COLOR TEMPERATURE

This is used to adjust the white areas of the picture if they appear bluish or reddish.

Normally "STANDARD" should be selected. If the white areas of the pictures appear reddish, set to "HIGH". If the white areas of the pictures appear bluish, set to "LOW".

Projecting sRGB-compatible pictures

sRGB is an international colour reproduction standard (IEC61966-2-1) established by the International Electrotechnical Commission (IEC). If you would like the colours in sRGB-compatible pictures to be reproduced more faithfully, make the following settings.

- ① Press the ▲ or ▼ button to select "PICTURE MODE", and then press the ◀ or ▶ button to select "NATURAL".
- ② Press the DEFAULT button on the remote control unit.
- ③ Press the ▲ or ▼ button to select "COLOR TEMPERATURE", and then press the ◀ or ▶ button to select "STANDARD".

NOTE:

- sRGB is only enabled when RGB signals are being input (when “LAMP POWER” is set to “STANDARD”, “AI” is set to “OFF”, and “DAYLIGHT VIEW” is set to “OFF”).

DAYLIGHT VIEW

This adjusts the vividness of the projected images when the projector is used under bright lighting.

AUTO

The vividness of the projected images will be adjusted according to the lighting condition of the room.

OFF

“DAYLIGHT VIEW” is disabled.

NOTE:

- “AUTO” may not function correctly if any objects are placed on the projector.
- “AUTO” will be disabled when “INSTALLATION” in the “OPTION” menu is set to “REAR/DESK” or “REAR/CEILING”.

AI

ON

The lamp is controlled according to the input signals to project images with the best quality.

OFF

“AI” is disabled.

NOTE:

- “AI” is disabled when “LAMP POWER” is set to “ECO-MODE”. (Refer to page 50.)

DETAILED SETUP

You can adjust the picture quality of the projected images in detail. Press the ENTER button to display the “DETAILED SETUP” menu.

WHITE BALANCE RED/GREEN/BLUE

(RGB only)

WHITE BALANCE RED	0	
WHITE BALANCE GREEN	0	
WHITE BALANCE BLUE	0	

This is used to adjust the white areas of the picture if they appear colourised.

To make the selected colour lighter:

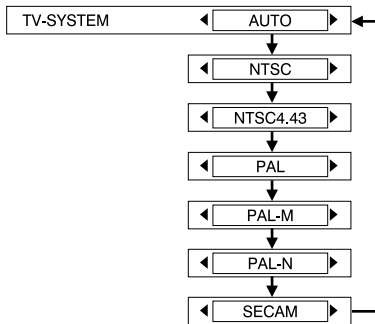

◀ button

To make the selected colour stronger:

▶ button

TV-SYSTEM

(S-VIDEO/VIDEO only)

This should normally be set to "AUTO". If the signal is of such poor quality that the correct format cannot be automatically distinguished, change the setting manually to the required TV system.

NOTE:

- When set to "AUTO", the projector automatically distinguishes between NTSC/NTSC 4.43/PAL/PAL60/PAL-M/PAL-N/SECAM signals.

STILL MODE

(S-VIDEO/VIDEO only)

To reduce flickering of still images (vertical flicker), set "STILL MODE" to "ON".

NOTE:

- Set to "OFF" when playing back moving images.

NOISE REDUCTION

(S-VIDEO/VIDEO only)

If the signal is of such poor quality that picture interference appears, set "NOISE REDUCTION" to "ON". To turn off the "NOISE REDUCTION" feature, set to "OFF".

Adjusting the position

- ① Press the MENU button to display the menu screen.
- ② Select the “POSITION” menu from the main menu, and then press the ENTER button.
- ③ Press the ▲ or ▼ button to select an item. (When RGB signals are being input, first press the AUTO SETUP button to initiate automatic positioning. If the optimum setting is not obtained when “AUTO SETUP” is carried out, adjust the items manually.)
- ④ Press the ◀ or ▶ button to adjust the value or change the setting. For items with selective setting or a bar scale, the individual adjustment screen will be displayed.

When an S-VIDEO/VIDEO signal is being input

REALTIME KEYSTONE	ON
KEYSTONE	0
POSITION	0 0
ASPECT	4:3
RESIZING	ON

When an RGB/YPbPr signal is being input

REALTIME KEYSTONE	ON
KEYSTONE	0
POSITION	0 0
DOT CLOCK	0
CLOCK PHASE	0
ASPECT	4:3
RESIZING	ON
FRAME LOCK	OFF

When WIRELESS is selected

REALTIME KEYSTONE	ON
KEYSTONE	0

REALTIME KEYSTONE

This projector detects its own degree of tilt and corrects the keystone distortion automatically.

ON

“REALTIME KEYSTONE” is enabled.

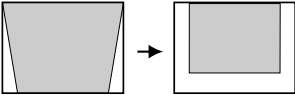

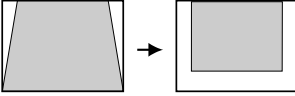

OFF

“REALTIME KEYSTONE” is disabled.

KEYSTONE

This projector detects its own degree of tilt and corrects the keystone distortion automatically (“REALTIME KEYSTONE”). However, keystone distortion may still affect the images in some cases (e.g. when the projector is tilted slightly and the tilt is corrected slowly by hand or when the screen itself is tilted). In such cases, set “REALTIME KEYSTONE” to “OFF” and correct the vertical keystone distortion manually.

Picture condition	
Operation	Press the ▲ or ► button.
Picture condition	
Operation	Press the ▼ or ◀ button.

NOTE:

- Vertical keystone distortion can be corrected to $\pm 30^\circ$ of the angle of tilt. However, the greater the correction amount, the more the picture quality will deteriorate, and the harder it will become to achieve a good level of focus. To obtain the best picture quality, set up the projector and screen in such a way that the amount of keystone correction required is as minimal as possible.
- The picture size will also change when correction of keystone distortion is carried out.
- The ratio of length and width of an image may become incorrect depending on the amount of the keystone correction.
- Keystone distortion of the on-screen display will not be corrected.
- You can correct the keystone distortion manually when "REALTIME KEYSTONE" is set to "ON". However, when you turn on the power, the amount of correction will be reset and "REALTIME KEYSTONE" will function again if the tilt is different from the last time you used the projector. If you correct the keystone distortion manually when "REALTIME KEYSTONE" is set to "OFF", the amount of correction

will be stored by the projector even after the power is turned off.

POSITION

(S-VIDEO/VIDEO/RGB/YPbPr only)

Moves the picture position.

Press the ENTER button to display the "POSITION" screen.

Press the ◀ or ► button to move the picture horizontally.

Press the ▲ or ▼ button to move the picture vertically.

DOT CLOCK

(RGB only)

Periodic striped pattern interference (noise) may occur when a striped pattern such as the one below is projected. If this happens, press the ◀ or ► button to adjust so that any such noise is minimised.

CLOCK PHASE

(RGB/YPbPr only)

Adjust the "DOT CLOCK" setting first before carrying out this adjustment. Press the ◀ or ► button to adjust so that the noise level is least noticeable.

NOTE:

- If signals with a dot clock frequency of 100 MHz or higher are being input, interference may not be completely eliminated when the "DOT

"CLOCK" and "CLOCK PHASE" adjustments are carried out.

ASPECT

(S-VIDEO/VIDEO/480i, 576i, 480p and 576p YPBPR only)

AUTO

(S-VIDEO only)

When an S1 video signal is being input, the aspect ratio is changed automatically to project a 16:9 picture.

4:3

The input signal is projected without change.

16:9

The picture is compressed to a ratio of 16:9 and projected.

When a horizontally squeezed signal is being input.

S4:3

The size of the input signal is compressed to 75% and projected. (This is useful for projecting a picture with a 4:3 aspect ratio onto a 16:9 screen.)

When a 4:3 signal is being input.

When using the 16:9 screen

S1 video signals

- S1 video signals are a type of video signal with an aspect ratio of 16:9 which include a detector signal. This detector signal is output by some sources such as wide-vision video decks.
- When "ASPECT" is set to "AUTO", the projector recognizes the detector signal and automatically switches the aspect ratio to 16:9.

NOTE:

- If using this projector in places such as cafes or hotels to display programmes for a commercial purpose or for public presentation, note that if the aspect ratio (16:9) selection function is used to change the aspect ratio of the screen picture, you may be infringing the rights of the original copyright owner for that programme under copyright protection laws.
- If a 4:3 picture is projected onto a 16:9 screen, distortion may occur around the edges of the picture so that part of the picture is no longer visible. Programmes which have 4:3 aspect ratios should be viewed in 4:3 mode to give proper consideration to the aims and intentions of the original programme's creator.

RESIZING

(S-VIDEO/VIDEO/RGB/YPbPr only)

This should normally be set to “ON”. (This setting is only for signals which have lower resolutions than the LCD panels. Refer to page 68 for details.)

ON

The pixel resolution of the input signal is converted to the same resolution as the LCD panels before being projected.

This may sometimes cause problems with the quality of the picture.

OFF

The input signal is projected at its original resolution, with no pixel conversion. The projected picture will be smaller than normal, so adjust the zoom setting or move the projector forwards or backwards to adjust the picture size if necessary. If set to “OFF”, some features, such as “DIGITAL ZOOM”, “REALTIME KEYSTONE”, “KEYSTONE” or “INDEX WINDOW” will not function.

FRAME LOCK

(RGB only)

If the picture's condition is bad while an RGB moving picture is projected, set “FRAME LOCK” to “ON”. Refer to page 68 for compatible RGB signals.

Changing the display language

- ① Press the MENU button to display the menu screen.
- ② Select the “LANGUAGE” menu from the main menu, and then press the ENTER button.
- ③ Press the ▲ or ▼ button to select a language, and then press the ENTER button.

Indicates the language which is currently set

Option settings

- ① Press the **MENU** button to display the menu screen.
- ② Select the **“OPTION”** menu from the main menu, and then press the **ENTER** button.
- ③ Press the **▲** or **▼** button to select an item.
- ④ Press the **◀** or **▶** button to change the setting. For **“DETAILED SETUP”**, press the **ENTER** button to display the next screen.

DETAILED SETUP	

INPUT GUIDE

When the input signal is changed, the input signal information will be displayed in the upper right corner of the projected images. You can select the level of the input signal information.

DETAILED

The input signal information will be displayed in detail.

OFF

The input signal information will not be displayed.

SIMPLE

Only the name of the input signal will be displayed.

NOTE:

- If **“INPUT GUIDE”** is set to **“DETAILED”**, the guide screen for computer connection will be displayed when PC1 or PC2 is selected and no signal is being input to the PC 1 IN or PC 2 IN connector. If you would like the guide screen not to be displayed, set **“INPUT GUIDE”** to **“SIMPLE”** or **“OFF”**.

STARTUP LOGO

ON

The **“Panasonic”** logo will be displayed when the power is turned on.

OFF

The **“Panasonic”** logo will not be displayed when the power is turned on.

POINTER SELECT

If you press the POINTER button on the remote control unit, the pointer will be displayed. You can select the pointer from 3 types as shown below (refer to page 35).

- 〔 ⊙ 〕 A double circle will be displayed.
- 〔 ⊕ 〕 A circle with a cross will be displayed.
- 〔 ☞ 〕 A hand will be displayed.

PC2 SELECT

This setting is used to select the function of the PC 2 IN/PC 1 OUT connector. When set to “INPUT”, it is set to the PC 2 IN connector. When set to “OUTPUT”, it is set to the PC 1 OUT connector.

LAMP POWER

This setting changes the lamp brightness. When set to “ECO-MODE”, the luminance of the lamp is reduced, but the projector uses less power, and the operating noise is also reduced. This can help to extend the lamp’s operating life. If using the projector in small rooms where high luminance is not required, it is recommended that you set the “LAMP POWER” to “ECO-MODE”.

NOTE:

- “LAMP POWER” cannot be set when no signal is being input.

LAMP RUNTIME

This setting displays the usage time for the lamp unit which is currently being used. When replacing the lamp unit, follow the instructions on page 61, and reset “LAMP RUNTIME” to “0”.

NOTE:

- The lamp’s operating life varies depending on the usage conditions (such as the “LAMP POWER” setting and the number of times the power is turned on and off).

POWER OFF TIMER

If no signal is input to the projector for the duration of the period you set, the projector will return to standby mode. The period can be set from 15 minutes to 60 minutes in 5 minute intervals. If you don't use this feature, set it to "DISABLE".

DIRECT POWER ON

This sets the projector's start up status for when the mains lead is connected.

OFF

The projector will start from the same status as when the mains lead was disconnected. If the mains lead was disconnected during projection when the projector was used the last time, projection will start after the mains lead is connected.

ON

The projection will start after the mains lead is connected.

CONTROL PANEL

To disable the buttons on the projector, set "CONTROL PANEL" to "INVALID". A confirmation screen will then be displayed. Select "OK" by using ◀ or ▶ button. To use the buttons on the projector, set to "VALID" by using the remote control unit.

AUTO SETUP

This should normally be set to "AUTO".

AUTO

"AUTO SETUP" will be carried out when the input signal is changed to RGB.

BUTTON

"AUTO SETUP" will function only when you press the AUTO SETUP button.

SIGNAL SEARCH

This should normally be set to "ON".

ON

When the power is turned on and "AUTO SETUP" is running, the projector detects which signals are being input, and uses these signals for projection.

(If a picture is being projected, the signal source is not automatically changed.)

OFF

Use this setting when you do not want the signal source to be changed automatically when the power is turned on and "AUTO SETUP" is running.

INSTALLATION

This setting should be changed in accordance with the projector setting-up method. (Refer to page 18.)

FRONT/DESK

When the projector is placed on a desk or similar in front of a screen.

FRONT/CEILING

When the projector is placed in front of a screen and suspended from a ceiling using a ceiling bracket (sold separately).

REAR/DESK

When using a translucent screen and the projector is placed on a desk or similar.

REAR/CEILING

When using a translucent screen and the projector is suspended from a ceiling using a ceiling bracket (sold separately).

HIGHLAND

Set “HIGHLAND” to “ON”, when using this projector at high elevations (above 1 400 m) only.

RGB/YPbPr

(480i, 576i, 480p, 576p, 1 080/60i, 1 080/50i, 720/60p and VGA480 signals only)

This sets the signal that is input to the PC 1 IN and PC 2 IN/PC 1 OUT connector.

Normally “AUTO” should be selected. RGB or YPbPr is selected automatically depending on the synchronising signal status. If an image is not projected correctly, select “RGB” or “YPbPr” in accordance with the input signal.

VOLUME

You can adjust the volume of the sound that is output from the projector’s built-in speaker and VARIABLE AUDIO OUT connector.

DETAILED SETUP

Press the ENTER button to display the “DETAILED SETUP” menu.

INDEX WINDOW

This functions in the same way as the “INDEX WINDOW” button on the remote control unit. Refer to page 34 for details.

SHUTTER

This functions in the same way as the “SHUTTER” button on the remote control unit. Refer to page 32 for details.

OSD DESIGN

You can select the background for the OSD from 3 types.

TYPE1

Transparent black

TYPE2

Solid blue

TYPE3

Transparent navy blue

SXGA MODE

[RGB(SXGA) only]

Adjust this item if the projected image overflows from the screen when an SXGA signal is being input.

SXGA

Select this item normally.

SXGA+

When the edges of the projected

image are not visible, select this item.

XGA MODE

[RGB(XGA) only]

Adjust this item if the projected image overflows from the screen when an XGA signal is being input.

XGA

Select this item normally.

WXGA

Select this item when the edges of the projected image are not visible or the projected image is vertically elongated.

BLACKBOARD

Set to “ON” when “PICTURE MODE” is set to “BLACKBORD”. (Refer to page 40.)

BACK COLOR

This sets the colour which is projected onto the screen when no signal is being input to the projector.

Setting up the security function

This projector is equipped with a security function. A password input screen can be displayed, or a company URL can be set up and displayed at the bottom of the projected image.

- 1 Press the **MENU** button to display the menu screen.
- 2 Select the **“SECURITY”** menu from the main menu, and then press the **ENTER** button.

(When you use the **“SECURITY”** function for the first time)

Press the **▲**, **▶**, **▼**, **◀**, **▲**, **▶**, **▼** and **◀** buttons in order, then press the **ENTER** button.

(When a password change has been made before)

Type in the changed password, then press the **ENTER** button.

- 3 Press the **▲** or **▼** button to select an item.
- 4 Press the **◀** or **▶** button to

change the setting.
For **“PASSWORD CHANGE”** and **“TEXT CHANGE”**, press the **ENTER** button to display the next screen.

INPUT PASSWORD

The password input screen can be displayed when the power is turned on. All of the controls other than the **POWER** button are disabled unless the password is entered correctly.

OFF

“INPUT PASSWORD” is disabled.

ON

“INPUT PASSWORD” is enabled.

PASSWORD CHANGE

Passwords can be changed. Press the **ENTER** button to display the **“PASSWORD CHANGE”** screen.

- 1 Set a password by pressing the **▲**, **▼**, **◀**, and **▶** buttons. (A maximum of 8 buttons can be set.)
- 2 Press the **ENTER** button.
- 3 Enter the password again for confirmation.
- 4 Press the **ENTER** button.

NOTE:

- The entered password will appear as *. It will not be displayed on the screen.
- If you enter the wrong password, an error message will be displayed. Enter the correct password again.

TEXT DISPLAY

You can set text to be displayed at the bottom of the projected image at all times.

OFF

“TEXT DISPLAY” is disabled.

ON

“TEXT DISPLAY” is enabled.

TEXT CHANGE

The text which is displayed when “TEXT DISPLAY” is set to “ON” can be changed.

Press the ENTER button to display the “TEXT CHANGE” screen.

- ① Press the ▲, ▼, ◀ and ▶ buttons to select the characters, then press the ENTER button. (You can enter 22 characters continuously.)
 - Select “DELETE” to delete a character.
- ② Press the ▲, ▼, ◀ and ▶ buttons to select “OK”, then press the ENTER button.
 - Select “CANCEL” to cancel the change.

Wireless setup

You need to make adjustments on some items when controlling the projector with a personal computer by means of the wireless network. Refer to the accessory CD-ROM for details.

NETWORK	<input type="text" value="1"/>
NAME CHANGE	
INPUT PASSWORD	<input type="text" value="OFF"/>
PASSWORD CHANGE	
WEB CONTROL	<input type="text" value="OFF"/>
STATUS	
INITIALIZE	

NETWORK

Select the network setting you want to use.

NAME CHANGE

The name for this projector can be set.

INPUT PASSWORD

Set to "ON" if you want password confirmation to be used when controlling the projector with a personal computer by means of the wireless network.

PASSWORD CHANGE

Passwords can be changed.

WEB CONTROL

To control the projector with a personal computer by means of the wireless network, set the "WEB CONTROL" to "ON".

STATUS

The wireless settings will be displayed.

INITIALIZE

Wireless settings can be returned to the factory default settings.

When the TEMP indicator and the LAMP indicator are illuminated

There are two indicators on the control panel of the projector which give information about the operating condition of the projector. These indicators illuminate or flash to warn you about problems that have occurred inside the projector, so if you notice that one of the indicators is on, turn off the power and check the table below for the cause of the problem.

TEMP indicator		
Indicator display	Illuminated (red) (Lamp unit on)	Flashing (red) (Lamp unit off)
Problem	The surrounding temperature or the temperature inside the projector has become unusually high.	The surrounding temperature or the temperature inside the projector has become dangerously high, causing the lamp unit to automatically shut off.
Possible cause	<ul style="list-style-type: none"> • The ventilation holes may be covered. • The ambient temperature in the place of use may be too high. • The air filter may be blocked. 	
Remedy	<ul style="list-style-type: none"> • Uncover the ventilation holes. • Set up the projector in a place where the temperature is between 0 °C (32 °F) and 40 °C (104 °F) and the humidity is between 20% and 80% (with no condensation). [If you set the "HIGHLAND" to "ON" (page 52), set up the projector in a place where the temperature is between 0 °C (32 °F) and 35 °C (95 °F) and the humidity is between 20% and 80% (with no condensation).] • Disconnect the mains lead by following the procedure on page 28, and then clean the air filter. (Refer to page 59.) 	

LAMP indicator			
Indicator display	Illuminated (red)	Flashing (red)	
Problem	It is nearly time to replace the lamp unit.	An abnormality has been detected in the lamp circuit.	
Possible cause	<ul style="list-style-type: none"> Does “REPLACE LAMP” appear on the screen after the projector is turned on? 	<ul style="list-style-type: none"> The power may have been turned on straight away after it was turned off. 	<ul style="list-style-type: none"> There may be an abnormality in the lamp circuit. The lamp unit may be blown.
Remedy	<ul style="list-style-type: none"> This occurs when the operation time for the lamp unit is nearing 1 800 hours (when “LAMP POWER” has been set to “STANDARD” and when “AI” has been set to “OFF”). Ask your dealer or an Authorised Service Centre to replace the lamp unit. (page 60) 	<ul style="list-style-type: none"> Wait for a while until the lamp unit cools down before turning the power back on again. 	<ul style="list-style-type: none"> Disconnect the mains lead by following the procedure on page 28, and then contact an Authorised Service Centre. Ask your dealer or an Authorised Service Centre to replace the lamp unit. (page 60)

NOTE:

- Be sure to disconnect the mains lead by following the procedure given in “Turning off the power” on page 28 before carrying out any of the procedures in the “Remedy” column.
- If the TEMP indicator is illuminated and the power turns off after the procedures in the “Remedy” column have been carried out, it means an abnormality has occurred. Please contact an Authorised Service Centre so that the necessary repairs can be made.

Cleaning and replacing the air filter

If the air filter becomes clogged with dust, the internal temperature of the projector will rise, the TEMP indicator will illuminate and the projector's power will turn off (the TEMP indicator will flash after the power is turned off). **The air filter should be cleaned every 100 hours of use.**

Cleaning

Use a vacuum cleaner to clean off any accumulated dust.

Air filter cover

NOTE:

- If the dust cannot be cleaned by a vacuum cleaner, remove the air filter and soak it in water, and then wash out the dust by hand. Be sure to install the air filter after it has dried.
- Do not use detergent when washing the air filter.
- If the dust cannot be removed by cleaning, it is time to replace the air filter. Please consult your dealer. Furthermore, if the lamp unit is being replaced, replace the air filter at this time also.

Replacement procedure

- ① Turn off the power and disconnect the mains lead. Be sure to disconnect the mains lead by following the procedure given on page 28.
- ② Gently turn the projector upside down, and then remove the air filter cover.

Air filter cover

- ③ Replace the air filter, and then install the air filter cover.

Air filter

NOTE:

- Be sure to install the air filter before using the projector. If the projector is used without the air filter installed, dust and other foreign particles will be drawn into the projector, and malfunctions will result.

Replacing the lamp unit

Warning

When replacing the lamp, allow it to cool for at least one hour before handling it.

- The lamp cover gets very hot, and touching it can cause burns.

Notes on replacing the lamp unit

- The light generating lamp is made of glass, so dropping it or allowing it to hit hard objects may cause it to burst. Be careful when handling the lamp.
- Dispose of the removed old lamp with the same care that would be taken with a fluorescent light.
- A Phillips screwdriver is necessary for removing the lamp unit.

NOTE:

- The projector is not supplied with a replacement lamp unit. Please ask your dealer for details. Lamp unit product no.: **ET-LAB30**

CAUTION:

- Do not use any lamp unit other than the one with the product number indicated above.

Lamp unit replacement period

The lamp is a consumable product. Even when the full life of the bulb has not been exhausted, the brightness of the light will gradually decline. Therefore periodic replacement of the lamp is necessary.

The intended lamp replacement interval is 2 000 hours, but it is possible that the lamp may need to be replaced earlier due to variables such as a particular lamp's characteristics, usage conditions and the installation environment.

Early preparation for lamp replacement is encouraged.

The lamp will automatically shut off after approximately 10 minutes when 2 000 hours of use have been reached because of a much greater chance of it exploding after this time.

NOTE:

- The usage hours explained above are for when "LAMP POWER" in the "OPTION" menu has been set to "STANDARD" and when "AI" in the "PICTURE" menu has been set to "OFF". If "LAMP POWER" is set to "ECO-MODE", or "AI" is set to "ON", the life of the lamp can be extended.
- While 2 000 hours is the intended replacement interval, it is not a period of time covered by warranty.

	<p>On-screen display</p> 	<p>LAMP indicator</p> 
More than 1 800 hours	Displayed for 30 seconds. Pressing any button will clear the display.	Illuminates red during image projection and standby mode.
More than 2 000 hours	Remains displayed until any button is pressed.	

Lamp unit replacement procedure

NOTE:

- If the lamp usage time has passed 2 000 hours (when “LAMP POWER” has been set to “STANDARD” and when “AI” has been set to “OFF”), the projector will switch to standby mode after approximately 10 minutes of operation. The steps ⑦ to ⑫ on the next page should thus be completed within 10 minutes.

- ① Disconnect the mains lead from the projector by following the procedure on page 28, and check that the area around the lamp unit has cooled down.
- ② Use a Phillips screwdriver to turn the lamp unit cover fixing screws at the bottom of the projector, and then remove the lamp unit cover.

Lamp unit cover fixing screws

- ③ Use a Phillips screwdriver to loosen the two lamp unit fixing screws until the screws turn freely. Then hold the handles of the lamp unit and gently pull the lamp unit out from the projector.

- ④ Insert the new lamp unit while making sure that the direction of insertion is correct, and then use a Phillips screwdriver to securely tighten the lamp unit fixing screws.

When inserting the new lamp unit, be sure to push it in at the point A and B.

- ⑤ **Install the lamp unit cover, and then use a Phillips screwdriver to securely tighten the lamp unit cover fixing screws.**

NOTE:

- Be sure to install the lamp unit and the lamp unit cover securely. If they are not securely installed, it may cause the protection circuit to operate so that the power cannot be turned on.

- ⑥ **Connect the mains lead.**
- ⑦ **Press the POWER button so that a picture is projected onto the screen.**

NOTE:

- If “DIRECT POWER ON” in the “OPTION” menu has been set to “ON”, projection will start after the mains lead is connected. Refer to page 51 for details.

- ⑧ **Press the MENU button to display the menu screen, and then press the ▲ or ▼ button to select the “OPTION” menu.**

- ⑨ **Press the ENTER button, and then press the ▲ or ▼ button to select “LAMP RUNTIME”.**
- ⑩ **Press and hold the ENTER button for approximately 3 seconds.**

The “LAMP RUNTIME” screen will be displayed.

NOTE:

- Press any button other than the POWER button to cancel the “LAMP RUNTIME” screen.

- ⑪ **Press the POWER button to turn off the power.**
- ⑫ **Disconnect the mains lead after the POWER button on the projector illuminates red.**
This will reset the cumulative usage time for the lamp unit to “0”.

Before calling for service

Before calling for service, check the following points.

Problem	Possible cause	Page
Power does not turn on.	● The mains lead may not be connected.	–
	● The main power supply is not being supplied to the mains socket.	–
	● TEMP indicator is illuminated or flashing.	57
	● LAMP indicator is illuminated or flashing.	58
	● The lamp unit cover has not been securely installed.	–
No picture appears.	● The video signal input source may not be connected properly.	–
	● The input selection setting may not be correct.	30
	● The “BRIGHTNESS” adjustment setting may be at the minimum possible setting.	41
	● The “SHUTTER” function may be in use.	32, 53
The picture is fuzzy.	● The lens cover may still be attached to the lens.	–
	● The lens focus may not have been set correctly.	27
	● The projector may not be at the correct distance from the screen.	20
	● The lens may be dirty.	–
	● The projector may be tilted too much.	18
The colour is pale or grayish.	● “COLOR” or “TINT” adjustment may be incorrect.	41
	● The input source which is connected to the projector may not be adjusted correctly.	–
No sound can be heard.	● The audio signal source may not be connected properly.	–
	● The volume adjustment may be at the lowest possible setting.	32, 52
	● A cable may be connected to the VARIABLE AUDIO OUT connector.	21, 22, 23
The remote control unit does not operate.	● The battery may be weak.	–
	● The battery may not be inserted correctly.	24
	● The remote control signal receptor on the projector may be obstructed.	24
	● The remote control unit may be out of the operation range.	24
The buttons on the projector do not function.	● The “CONTROL PANEL” may be set to “INVALID”. In order to set the “CONTROL PANEL” to “VALID” without using the remote control unit, keep holding down the ENTER button on the projector and press the MENU button for more than 2 seconds.	51

Problem	Possible cause	Page
The picture does not display correctly.	● The signal format ("TV-SYSTEM") may not be set correctly.	43
	● There may be a problem with the video tape or other signal source.	–
	● A signal which is not compatible with the projector may be being input.	68
Picture from computer does not appear.	● The cable may be too long.	–
	● The external video output for the laptop computer may not be set correctly. (The actual method varies depending on the type of computer, so refer to the documentation provided with your computer for further details.)	69
	● If an PC INPUT indicator is turned off, the video signals may not be output from the computer.	14
	● "PC2 SELECT" in the "OPTION" menu is set to "OUTPUT" when the signals are input to PC 2 IN/PC 1 OUT connector.	50

Cleaning and maintenance

Before carrying out cleaning and maintenance, be sure to disconnect the mains plug from the mains socket.

Wipe the cabinet with a soft, dry cloth.

If the cabinet is particularly dirty, soak the cloth in water with a small amount of neutral detergent in it, squeeze the cloth very well, and then wipe the cabinet. After cleaning, wipe the cabinet dry with a dry cloth. If using a chemically-treated cloth, read the instructions supplied with the cloth before use.

Do not wipe the lens with a cloth that is dusty or which produces lint.

If any dust or lint gets onto the lens, such dust or lint will be magnified and projected onto the screen. Use a blower to clean any dust and lint from the lens surface, or use a soft cloth to wipe off any dust or lint.

Specifications

Power supply:	100 V - 240 V ~, 50 Hz/60 Hz
Power consumption:	300 W [During standby (when fan is stopped): Approx. 3 W]
Amps:	3.5 A - 1.8 A
LCD panel:	
Panel size (diagonal):	
PT-LB60NTE:	0.8 type (20.32 mm)
PT-LB55NTE:	0.7 type (17.78 mm)
Aspect ratio:	4:3
Micro lens array:	Available
Display method:	3 transparent LCD panels (RGB)
Drive method:	Active matrix method
Pixels:	786 432 (1 024 x 768) x 3 panels
Lens:	Manual zoom (1.2x) / Manual focus F 1.7 - 1.8 f 24.0 mm - 28.8 mm
Lamp:	UHM lamp (220 W)
Luminosity:	
PT-LB60NTE:	3 200 lm
PT-LB55NTE:	2 500 lm
Scanning frequency (for RGB signals):	
Horizontal scanning frequency:	15 kHz - 91 kHz
Vertical scanning frequency:	50 Hz - 85 Hz
Dot clock frequency:	Less than 100 MHz
YPbPr signals:	480i, 576i, 480p, 576p, 1 080/60i, 1 080/50i, 720/60p
Colour system:	7 (NTSC/NTSC 4.43/PAL/PAL-M/PAL-N/PAL60/SECAM)
Projection size:	838.2 mm - 7 620 mm (33" - 300")
Throw distance:	
PT-LB60NTE:	1.1 m - 10.8 m (3'7" - 35'5")
PT-LB55NTE:	1.2 m - 12.0 m (3'11" - 39'4")
Optical axis shift:	
PT-LB60NTE:	6:1 (fixed)
PT-LB55NTE:	9:1 (fixed)
Screen aspect ratio:	4:3
Installation:	Front/Desk Front/Ceiling Rear/Desk Rear/Ceiling (menu selection)
Speaker:	4 cm x 3 cm oval x 1
Max. usable volume output:	1 W (mono)
Wireless LAN:	IEEE802.11 b/g
Connectors	
PC IN/OUT:	Dual line, D-sub HD 15-pin (female)

(One line is available for input and output, selectable using an on-screen menu)

During RGB input/output:

R.G.B.: 0.7 V [p-p], 75 Ω
G.SYNC: 1.0 V [p-p], 75 Ω
HD, VD: TTL, automatic positive/negative polarity compatible

During YPBPR input/output:

Y: 1.0 V [p-p] (Including sync), 75 Ω
PB, PR: 0.7 V [p-p], 75 Ω

VIDEO IN: Single-line, RCA pin jack, 1.0 V [p-p], 75 Ω

S-VIDEO IN: Single-line, Mini DIN 4-pin
Y 1.0 V [p-p], C 0.286 V [p-p], 75 Ω

AUDIO IN (for S-VIDEO/VIDEO): Single-line, 0.5 V [rms] RCA pin jack x 2 (L-R)

PC AUDIO IN: Dual-line, 0.5 V [rms] M3 jack (Stereo MINI)

VARIABLE AUDIO OUT: Single-line, 0.5 V [rms] M3 jack (Stereo MINI)
(Monitor output/stereo compatible)

0 V [rms] - 2.0 V [rms] (variable)

SERIAL: DIN 8-pin RS-232C compatible

Cabinet: Moulded plastic (PC/ABS)

Dimensions:

Width: 327 mm (12-27/32")

Length: 233 mm (9-5/32")(without lens cover)

Height: 83 mm (3-1/4")

Weight: 2.6 kg (5.7 lbs.)

Operating environment:

Temperature: 0 °C - 40 °C (32 °F - 104 °F)
[When the "HIGHLAND" is set to "ON"
(page 52): 0 °C - 35 °C (32 °F - 95 °F)]

Humidity: 20% - 80% (no condensation)

Certifications: EN60950, EN55022, EN61000-3-2,
EN61000-3-3, EN55024

<Remote control unit>

Power supply: 3 V DC (AAA battery x 2)

Operating range: Approx. 7 m (23') (when operated directly
in front of signal receptor)

Weight: 74 g (2.6 ozs.) (including battery)

Dimensions:

Width: 51.5 mm (2")

Length: 123 mm (4-13/16")

Height: 21.1 mm (-13/16")

<Options>

Ceiling bracket ET-PKB30

Wireless remote control unit ET-RM300

Serial adapter ET-ADSER

(DIN 8-pin/D-sub 9-pin)

Appendix

Projection dimensions calculation methods

If the screen size (diagonal) is SD (m), then the following formula is used to calculate the projection distance for the wide lens position (LW) and the projection distance for the telephoto lens position (LT).

PT-LB60NTE	$LW=0.0303 \times SD / 0.0254 - 0.044$
	$LT=0.0364 \times SD / 0.0254 - 0.044$
PT-LB55NTE	$LW=0.0337 \times SD / 0.0254 - 0.044$
	$LT=0.0405 \times SD / 0.0254 - 0.044$

For 16:9 aspect ratios, the following formula can be used to calculate the projection distance.

PT-LB60NTE	$LW=0.0331 \times SD / 0.0254 - 0.044$
	$LT=0.0397 \times SD / 0.0254 - 0.044$
PT-LB55NTE	$LW=0.0369 \times SD / 0.0254 - 0.044$
	$LT=0.0443 \times SD / 0.0254 - 0.044$

*The values obtained from the formulas above are approximate.

NOTE:

- If 4:3 images are projected onto a 16:9 screen that has been set using the projection distance for a 16:9 screen, the 4:3 images will overflow the screen at the top and bottom. In such cases, set "ASPECT" to "S4:3". (Refer to page 46 for details.)

List of compatible signals

Mode	Display resolution (dots)*1	Scanning frequency		Dot clock frequency (MHz)	Picture quality*2	Resizing*3	Format
		H (kHz)	V (Hz)

	1 440 x 900	55.9	59.9	106.5	A		RGB

*1 The “i” appearing after the resolution indicates an interlaced signal.

*2 The following symbols are used to indicate picture quality.

AA Maximum picture quality can be obtained.

A Signals are converted by the image processing circuit before picture is projected.

B Some loss of data occurs to make projection easier.

*3 Signals with “OK” are compatible with the “RESIZING” function. (page 47)

*4 Signals that are compatible with the “FRAME LOCK” function. (page 47)

*5 Signals that are compatible with the CVT standard.

Guide screen for computer connection

Refer to the list below for details on the keyboard commands to change the output setting.

Manufacturer	Keyboard command	Manufacturer	Keyboard command
Panasonic NEC	Fn + F3	EPSON DELL	Fn + F8
TOSHIBA SHARP HP	Fn + F5	IBM SONY Apple	Fn + F7 F7
FUJITSU	Fn + F10	Other	Fn + 

NOTE:

- The actual method varies depending on the type of computer, so refer to the documentation provided with your computer for further details.

Using the SERIAL connector

The serial connector which is on the connector panel of the projector conforms to the RS-232C interface specification, so that the projector can be controlled by a personal computer which is connected to this connector.

Connection

NOTE:

- You must use only RS-232C Serial Interface Cable with ferrite core, type ET-ADSER.

Pin assignments and signal names

Pin No.	Signal name	Contents
③	RXD	Received data
④	GND	Earth
⑤	TXD	Transmitted data
①		Connected internally
②		
⑥		
⑦		NC
⑧		NC

Communications settings

Signal level	RS-232C
Sync. method	Asynchronous
Baud rate	9 600 bps
Parity	None
Character length	8 bits
Stop bit	1 bit
X parameter	None
S parameter	None

Basic format

The data sent from the computer to the projector is transmitted in the format shown below.

NOTE:

- The projector can not receive the command for 10 seconds after the lamp is switched on. Wait 10 seconds before sending the command.
- If sending multiple commands, check that a response has been received from the projector for one command before sending the next command.
- When a command which does not require parameters is sent, the colon (:) is not required.
- If an incorrect command is sent from the personal computer, the "ER401" command will be sent from the projector to the personal computer.

Control commands

The commands which the personal computer can use to control the projector are shown in the following table.

Command	Control Contents	Remarks
PON	Power ON	In standby mode, all commands other than the PON command are ignored. <ul style="list-style-type: none"> The PON command is ignored during lamp ON control.
POF	Power OFF	<ul style="list-style-type: none"> If a PON command is received while the cooling fan is operating after the lamp has switched off, the lamp is not turned back on again straight away, in order to protect the lamp.
AVL	Volume	Parameter 000-063 (Adjustment value 0-63)
IIS	Input signal selection	Parameter VID=VIDEO SVD=S-VIDEO RG1=PC1 RG2=PC2 NWP=WIRELESS
Q\$\$	Lamp ON condition query	Callback 0 = Standby 1 = Lamp ON control active 2 = Lamp ON 3 = Lamp OFF control active
OSH	Shutter function	Operation will be switched between ON and OFF each time the command is sent. Do not switch operation ON and OFF after only short periods of time. If a command other than "OSH" is sent to the projector when the shutter function is used, the "ER401" command will be sent from the projector to the computer and the shutter function will be turned off.
