Contents

Introduction

Product Features

This product is a single-chip DLP® projector. Outstanding features include:

- DLP® technology

- P7305W/F125/PF-W07 series: True 1280x800 WXGA resolution
  P7505/F155/PF-807/H9505BD/E255D/HE-822J series: True 1920x1080 1080p resolution
  P7605/F165/PF-WU07 series: True 1920x1200 WUXGA resolution
  Full/4:3/16:9/L.Box aspect ratio supported

- Acer ColorBoost technology delivers nature's true colors for vivid, life-like images

- Acer ColorSafe II technology ensures consistent color rendition over time

- Enables projecting 3D content via DLP Link Technology: Blue-Ray 3D supported and Nvidia 3DTV Play Ready

- Enrichs 3D experience for 2D contents via 2D to 3D convert function

- High brightness and contrast ratio

- Versatile display modes (Bright, Presentation, Standard, Video, Movie, Dark Cinema, Game, Sports, User) enable optimum performance in any situation

- NTSC / PAL / SECAM compatible and HDTV (720p, 1080i, 1080p) supported

- Side-sliding lamp design allows easy lamp replacement

- Lower power consumption and economy (ECO) mode extends lamp life

- Acer EcoProjeciton Technology delivers Intelligent power management approach and physical efficiency improvement

- Equipped with HDMI™ connection supporting HDCP

- Advanced digital keystone correction optimizes presentations

- Smart detection delivers quick, intelligent source detection

- Multi-language on screen display (OSD) menus

- Full-function remote control

- Manual focus projection lens zooms up to 1.5x

- 2x digital zoom and pan move function

- Microsoft® Windows® 2000, XP, Vista®, Windows® 7, Windows® 8, OS compliant
- Manual lens shift adjustment

Note: Functions vary depending on model definition.

Package Overview

This projector comes with all the items shown below. Check to make sure your unit is complete. Contact your dealer immediately if any thing is missing.

Projector with lens cap	Power cord	VGA cable
Composite video cable	Security card	User's guide
Remote control (option)	Quick start guide	2 x Batteries (option)
Carrying case	USB WiFi adapter (option)	Dust filter (option)
User's guide (for multi-media and wireless functions)	Quick start guide (for multi-media and wireless functions)

#	Icon	Function	Description
15		MENU	• Press "**MENU**" to launch the Onscreen display (OSD) menu, back to the previous step for the OSD menu operation or exit the OSD menu. • Confirm your selection of items.
16		MOUSE_Left/Right Click	Left-/right-click buttons are on the left and right, respectively; the center button works as a multidirectional pointer stick. To enable this function, an USB cable must be connected to projector from your PC.
17		MOUSE_Four directional select keys	
18		MODE	Press "MODE" to select the display mode.
19		VOLUME +/-	Increases/decreases the volume.
20		PAGE	For computer mode only. Use this button to select the next or previous page. This function is only available when connected to a computer via a USB cable.
21		Prev	Press "**Prev**" to go to previous index or page in file list view.
		Next	Press "**Next**" to go to next index or page in file list view.
		Play/Pause	Press "**Play/Pause**" to play/pause media file.
		Stop	Press "**Stop**" to stop playing media file.
22		VGA	Press "**VGA**" to change source to the VGA connector. This connector supports analog RGB, YPbPr (480p/576p/720p/1080i), YCbCr (480i/576i) and RGBsync.
23		S-VIDEO	To change source to S-Video.
24		INFO	Press "INFO" to display media information.
25		COMPONENT	Press "**COMPONENT**" to change source to Component video. This connection supports YPbPr (480p/576p/720p/1080i) and YCbCr (480i/576i).
26		VIDEO	To change source to COMPOSITE VIDEO.
27		SD/USB A	Press "**SD/USB A**" to change source to USB A. (no SD function)
28		USB B	Press "**USB B**" to change source to USB B.
29		HDMI™/DVI	Press "**HDMI™/DVI**" to change source to HDMI™ (no DVI function).
30		LAN/WiFi	Press "**LAN/WiFi**" to display the image which is wire or wirelessly transmitted from the PC to the projector via the "**Acer LAN webpage management**" utility. (Acer Projector Multimedia CD)
31		KeyPad 0~9	Press "**0~9**" to input a password in the "**Security**".
32		ASPECT RATIO	Choose the desired aspect ratio.
33		RESYNC	Automatically synchronizes the projector to the input source.
34		MEDIA_HOME	Press "HOME" to return to the home page of media mode.

Note: Functions vary depending on model definition.

Getting Started

Connecting the Projector

#	Description	#	Description
1	Power cord	9	Audio cable Jack/RCA
2	LAN cable	10	VGA to component/HDTV adapter
3	USB cable	11	3 RCA component cable
4	HDMI cable	12	RS232 cable
5	VGA cable	13	Audio cable jack for wired remote
6	S-Video cable	14	12V DC cable
7	Composite video cable	15	Mouse
8	Audio cable jack/jack	16(*)	USB disk/stick USB WiFi adapter (for USB A2 only)

Note: To ensure the projector works well with your computer, please make sure the timing of the display mode is compatible with the projector.
Note: "*" USB drive limitation, do not support power consumption over 500mA. Please have external power for USB device.
Note: To enable wireless function, the USB wireless adapter must be plugged into the USB A2 port.
Note: Functions vary depending on model definition.

Turning the Projector On/Off

Turning on the Projector

1   Remove the lens cap.(Illustration #1)

2   Ensure that the power cord and signal cable are securely connected. The
     Power indicator LED will flash red.

3   Turn on the projector by pressing "**Power**" button on the control panel,
     and the Power indicator LED will turn blue.(Illustration #2)

4   Turn on your source (computer, notebook, video player ,etc.). The
     projector will detect your source automatically.

     •   If the screen displays "Lock" and "Source" icons, it means the
          projector is locked onto a specific source type and there is no such
          type of input signal detected.

     •   If the screen displays "No Signal", please make sure the signal cables
          are securely connected.

     •   If you connect to multiple sources at the same time, use the "Source"
          button on either control panel or the remote control or direct source
          key on the remote control to switch between inputs.
Turning the projector off

1   To turn the projector off, press the power button. This message appears:
     "Please press the power button again to complete the shutdown process."
     Press the power button again.

2   The LED power indicator will turn RED and blink rapidly after the projector
     is turned off, and the fan(s) will continue to operate for about 2 minutes to
     ensure that the system cools properly. (only supported under "Instant
     Resume" mode)

3   As long as the power cord remains plugged in, you can press the power
     button to turn the projector immediately back on anytime during the 2-
     minute shutdown process. (only supported under "Instant Resume" mode)

4   Once the system has finished cooling, the LED power indicator will stop
     blinking and turn solid red to indicate standby mode.

5   It is now safe to unplug the power cord.

        Warning indicators:

•   **"Please press the power button again to complete the shutdown
      process."**
      This onscreen message indicates that the projector has overheated.
      The lamp with automatically turn off, the projector will automatically
      shut down, and the LED temp indicator will turn solid red. Contact
      your local dealer or service center.

•   **"Fan failed. Lamp will automatically turn off soon."**
      This onscreen message indicates that the fan has failed. The lamp will
      automatically turn off, the projector will automatically shut down,
      and the LED temp indicator will blink. Contact your local dealer or
      service center.

      Note: Whenever the projector automatically shuts down and the
      LED lamp indicator turns solid red, contact your local reseller or
      service center.

Adjusting the Projected Image

Adjusting the Height of Projected Image

The projector is equipped with elevator feet for adjusting the height of image.

To raise/lower the image:

1   Raise the image to the desired height angle (Illustration #1), then pull out the stand feet into position.

2   Use Tilt adjusting wheel (Illustration #2) to fine-tune the display angle.

3   Use Lens shift control rings to move the image to the ideal position. (refer to page 20)

1 Elevator feet

2 Tilt adjusting wheels
How to optimize image size and distance

Consult the table below to find the optimal image sizes achievable when the projector is positioned at a desired distance from the screen.

• WUXGA series

If the projector is 2.0 m from the screen, good image quality is possible for image sizes between 41" and 62".

Note: Remind as below figure, the space of 100 cm height is required when located at 2.0 m distance.

| Desired Distance (m) <A>	Screen size (Min zoom)		Top	Screen size (Max zoom)		Top
	Diagonal (inch) <B>	W (cm) x H (cm)	From base to top of image (cm) <C>	Diagonal (inch) <B>	W (cm) x H (cm)	From base to top of image (cm) <C>
1.5	31	66 x 41	49	47	100 x 63	75
2	41	88 x 55	66	62	134 x 84	100
2.5	51	110 x 69	82	78	167 x 105	126
3	61	132 x 82	99	93	201 x 126	151
3.5	71	154 x 96	115	109	234 x 146	176
4	81	176 x 110	132	124	268 x 167	201
4.5	92	197 x 123	148	140	301 x 188	226
5	102	219 x 137	165	155	335 x 209	251
6	122	263 x 165	197	186	402 x 251	301
7	143	307 x 192	230	218	469 x 293	351
8	163	351 x 219	263	249	535 x 335	402
9	183	395 x 247	296	280	602 x 377	452
10	204	439 x 274	329	311	669 x 418	502
11	224	483 x 302	362	342	736 x 460	552
12	244	527 x 329	395	373	803 x 502	602

Zoom Ratio: 1.5x

- 1080p series

If the projector is 2.0 m from the screen, good image quality is possible for image sizes between 40" and 60".

Note: Remind as below figure, the space of 98 cm height is required when located at 2.0 m distance.

| Desired Distance (m) <A>	Screen size (Min zoom)		Top	Screen size (Max zoom)		Top
	Diagonal (inch) <B>	W (cm) x H (cm)	From base to top of image (cm) <C>	Diagonal (inch) <B>	W (cm) x H (cm)	From base to top of image (cm) <C>
1.5	30	66 x 37	48	45	110 x 56	73
2	40	88 x 49	64	60	134 x 75	98
2.5	50	110 x 62	80	76	167 x 94	122
3	59	132 x 74	96	91	201 x 113	147
3.5	69	154 x 86	112	106	234 x 132	171
4	79	176 x 99	128	121	268 x 151	196
4.5	89	197 x 111	144	136	301 x 169	220
5	99	219 x 123	160	151	335 x 188	245
6	119	263 x 148	193	181	402 x 226	294

Zoom Ratio: 1.5x

How to get a preferred image size by adjusting distance and zoom

The table below shows how to achieve a desired image size by adjusting either the position or the zoom ring.

- WUXGA series

To obtain an image size of 60" set the projector at a distance 1.9 m and 2.9 m from the screen.
Desired Image Size		Distance (m)		Top (cm)
Diagonal (inch) <A>	W (cm) x H (cm)	Max zoom <B>	Min zoom <C>	From base to top of image <D>
30	65 x 40	1.0	1.5	48
40	86 x 54	1.3	2.0	65
50	108 x 67	1.6	2.5	81
60	129 x 81	1.9	2.9	97
70	151 x 94	2.3	3.4	113
80	172 x 108	2.6	3.9	129
90	194 x 121	2.9	4.4	145
100	215 x 135	3.2	4.9	162
120	258 x 162	3.9	5.9	194
150	323 x 202	4.8	7.4	242
180	388 x 242	5.8	8.8	291
200	431 x 269	6.4	9.8	323
250	538 x 337	8.0	12.3	404
300	646 x 404	9.7		485

Zoom Ratio: 1.5x

- 1080p series

To obtain an image size of 60" set the projector at a distance 2.0 m and 3.0 m from the screen.
Desired Image Size		Distance (m)		Top (cm)
Diagonal (inch) <A>	W (cm) x H (cm)	Max zoom <B>	Min zoom <C>	From base to top of image <D>

300	646 x 404	10.1	***	525

Zoom Ratio: 1.5x

How to get a preferred image position by adjusting lens shift

The projector is equipped with lens shift for adjusting the position of projected image right and left or up and down without requiring you to physically move the projector.

Note: The figures shown in this section are for reference only not approximate value. The figures between units can be different due to assembly tolerance.

Adjusting the horizontal or vertical image position

*   **WUXGA series**

The vertical image height can be adjusted 20% of the image height.
With the lens in the centre position the horizontal image position can be
adjusted to the left or right by up to a maximum of 15% of the image width.
- WXGA/1080p series

The vertical image height can be adjusted between 5% and 30% of the image height. (The minimum vertical image offset is fixed at 5% of the image height above the centre of the projector lens.)

With the lens in the centre position the horizontal image position can be adjusted to the left or right by up to a maximum of 15% of the image width.
User Controls

Installation menu

The installation menu provides an onscreen display (OSD) for projector installation and maintenance. Use the OSD only when the message "No signal input" is displayed on the screen.

The menu options include settings and adjustments for screen size and distance, focus, keystone correction and more .

1   Turn on the projector by pressing "**Power**" button on the control pad.

2   Press the "**MENU**" button on the control pad to launch the OSD for projector installation and maintenance.
3   The background pattern acts as a guide to adjusting the calibration and alignment settings, such as screen size and distance, focus and more .

4   The Installation menu includes the following options:

   •Projection method

   •Manual Keystone settings

   •LAN/WiFi settings

   •LAN IP/ Mask settings

   •Language settings

   •Reset to factory default function

   Use the up and down arrow keys to select an option, the left and right arrow keys to adjust selected option settings, and the right arrow key to enter a submenu for feature setting. The new settings will be saved automatically upon exiting the menu.

5   Push the menu button anytime to exit the menu and return to the Acer
   welcome screen.

Note: Functions vary depending on model definition.

Onscreen Display (OSD) Menus

The projector has multilingual OSD that allow you to make image adjustments and change a variety of settings.

Using the OSD menus

• To open the OSD menu, press **"MENU"** on the remote control or control panel.

• When the OSD is displayed, use the (▲)(▼) keys to select any item in the main menu. After selecting the desired main menu item, press (▶) to enter submenu for feature setting.

• Use the (▲)(▼) keys to select the desired item and adjust the settings by using the (◀)(▶) keys.

• Select the next item to be adjusted in the submenu and adjust as described above.

• Press **"MENU"** on the remote control or control panel, the screen will return to the main menu.

• To exit OSD, press **"MENU"** on the remote control or control panel again. The OSD menu will close and the projector will automatically save the new settings.

Main menu

Setting

Sub menu
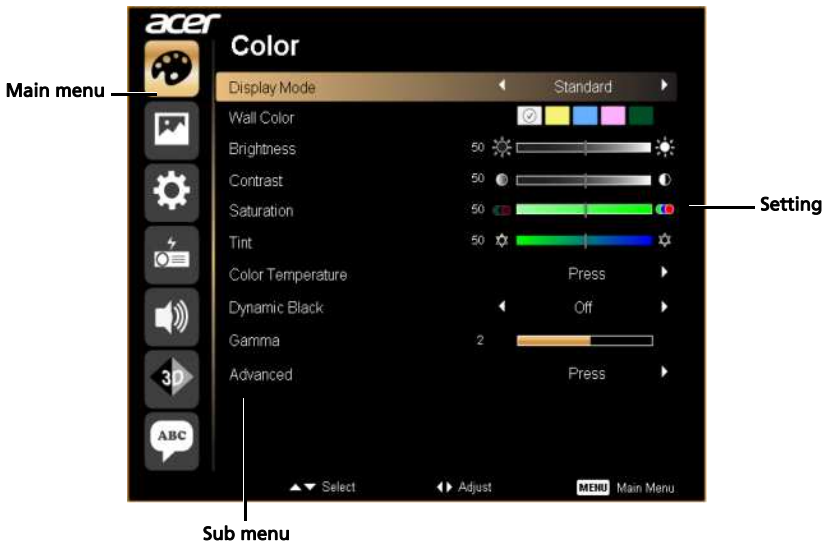

Note: Some of the following OSD settings may not be available. Please refer to the actual OSD of your projector.
Note: Functions vary depending on model definition.

Color

Display Mode	There are many factory presets optimized for various types of images. • Bright: For brightness optimization. • Presentation: For meeting presentation. • Standard: For common environment. • Video: For playing video in a bright environment. • Movie: For brighter and general movie/video/photo playing. • Dark Cinema: For dark movie content. • Game: For game content. • Sports: For sport picture. • User: Memorize user's settings.
Wall color	Use this function to choose a proper color according to the wall. There are several choices, including white, light yellow, light blue, pink, dark green. It will compensate the color deviation due to the wall color to show the correct image tone.
Brightness	Adjust the brightness of the image. • Press ◀ to darken the image. • Press ▶ to lighten the image.
Contrast	"Contrast" controls the difference between the lightest and darkest parts of the picture. Adjusting the contrast changes the amount of black and white in the image. • Press ◀ to decrease the contrast. • Press ▶ to increase the contrast.
Saturation	Adjusts a video image from black and white to fully saturated color. • Press ◀ to decrease the amount of color in the image. • Press ▶ to increase the amount of color in the image.
Tint	Adjusts the color balance of red and green. • Press ◀ to increase the amount of green in the image. • Press ▶ to increase the amount of red in the image.
Color Temperature	Mode Use this function to choose CT1, CT2 (Native), CT3, User mode.
	R Gain Adjusts the red gain for color temperature optimization.
	G Gain Adjusts the green gain for color temperature optimization.
	B Gain Adjusts the blue gain for color temperature optimization.
Dynamic Black	Choose "On" to automatically optimize the display of dark movie scenes enabling them to be shown in incredible detail.
Gamma	Effects the representation of dark scenery. With greater gamma value, dark scenery looks brighter.

Advanced	Ind. Color Management Adjusts the red, green, blue, cyan, yellow and magenta colors.
	Ind. Hue Adjusts the color balance of red and green.
	Ind. Saturation Adjusts the selected color to be less or more saturated color.
	Ind. Gain Adjusts the selected color's contrast.
	Brilliant Color Produces an expanded on-screen color spectrum that delivers enhanced color saturation for bright, true-to-life images.
	White Peaking Increases the brightness of whites that are near 100%. (video sources only)
	Film Mode Sets the image optimized to 24-frame True Film mode.
	Noise Reduction Adjusts signal noise reduction."0" means the noise reduction is off, ">0" increase noise reduction.
	Black Extension This ensures optimum black level for each analog source.

Note: "Saturation" and "Tint" functions are not supported under computer or HDMI mode.

Note: Functions vary depending on model definition.

Image

Projection	
	• Front-Desktop: The factory default setting.
	• Rear-Desktop: When you select this function, the projector reverses the image so you can project from behind a translucent screen.
	• Rear-Ceiling: When you select this function, the projector reverses and inverts the image at same time. You can project from behind a translucent screen with ceiling mounted projection.
	• Front-Ceiling: When you select this function, the projector inverts the image for ceiling-mounted projection.
Aspect Ratio	Use this function to choose your desired aspect ratio. • Auto: Keep the image with original width-higth ratio and maximize the image to fit native horizontal or vertical pixels. • Full: Resize image to fit full screen by width (1280 pixels) and height (800 pixels). • 4:3: The image will be scaled to fit the screen and displayed using a 4:3 ratio. • 16:9: The image will be scaled to fit the width of the screen and the height adjusted to display the image using a 16:9 ratio. • L.Box: Keep original signal aspect ratio and zoom in by 1.333 times.
Manual Keystone	Adjust image distortion caused by tilting projection. (±40 degrees) <Note> The Manual Keystone function is unavailable under Auto Keystone setting to "On".
Sharpeness	Adjusts the sharpness of the image. • Press ◀ to decrease the sharpness. • Press ▶ to increase the sharpness.
H. Position	• Press ◀ to move the image left. • Press ▶ to move the image right.
V. Position	• Press ◀ to move the image down. • Press ▶ to move the image up.
Frequency	"Frequency" changes the projector's refresh rate to match the frequency of your computer's graphics card. If you can see a vertical flickering bar in the projected image, use this function to make the necessary adjustments.
Tracking	Synchronizes the signal timing of the projector with the graphics card. If you experience an unstable or flickering image, use this function to correct it.

HDMI Color Range	Adjust the color range of the HDMI image data to correct color display error. • Auto: Automatically adjust by information from player. • Limited Range: Prosess the input image as limited color range data. • Full Range: Prosess the input image as full color range data.
HDMI Scan Info	Adjust the overscan ratio of the HDMI image on screen. • Auto: Automatically adjust by information from player. • Underscan: Always no overscan on HDMI image. • Overscan: Always keep overscan on HDMI image.

Note: "H. Position", "V. Position", "Frequency" and "Tracking" functions are not supported under HDMI or Video mode.
Note: "HDMI Color Range" and "HDMI Scan Info" functions are only supported under HDMI mode.
Note: Functions vary depending on model definition.

Setting

Startup Screen	Use this function to select your desired startup screen. If you change the setting, the changes will take effect when you exit the OSD menu. • Acer: The default startup screen of your Acer projector. • User: Use memorize picture from "Screen Capture" function.
Screen Capture	Use this function to customize the startup screen. To capture the image that you want to use as the startup screen, follow the instructions below. Notice: Before proceeding with the following steps, make sure that the "Keystone" is set to the default value 0 and the aspect ratio is set to 4:3. For details, refer to the "Image" section. • Change the "Startup Screen" from the default setting "Acer" to "User". • Press "Screen Capture" to customize the startup screen. • A dialog box appears to confirm the action. Choose "Yes" to use the current image as your customized startup screen. The capture range is the red rectangular area. Choose "No" to cancel the screen capture and exit the onscreen display (OSD). • A message appears, stating that the screen capture is in progress. • When the screen capture is finished, the message disappears and the original display is shown. • The customized startup screen, as shown below, takes effect when there is a new input signal or when you restart the projector.
Source Lock	When source lock is turned "off", the projector will search for other signals if the current input signal is lost. When source lock is turned "on", it will "lock" the current source channel unless you press "Source" button on the remote control for the next channel.
Closed Caption	Selects a preferred closed captioning mode from CC1, CC2, CC3, CC4, (CC1 displays captions in the primary language in your area). Select "Off" to turn off the captioning feature. This function is only available when a composite video or S-Video input signal is selected and its system format is NTSC. <Note> Set your screen aspect ratio to 4:3. This function is not available when the aspect ratio is "16:9" or "Auto" .
Auto Screen	Default is "On", the down/up move of electronic screen will be related with power on/off of Projector.
VGA OUT (Standby)	Default is "Off". Choose "On" to enable VGA OUT connection.
LAN/WiFi	**LAN/WiFi** Default is "Off". Choose "On" to enable LAN connection. <Note> If users want to do LAN control under standby mode, change VGA OUT (Standby) from Off to On.
	LAN IP/ Mask Identify IP and Mask address.
	LAN Reset Reset LAN function.
Reset	• Press the ▶ button and choose "Yes" to return the parameters on all menus to the factory default settings.

Security	**Security**
	This projector provides a useful security function for the administrator to manage usage of the projector .
	Press ▶ to change the "Security" setting. If the security function is enabled, your must enter the "Administrator Password" first before changing the security settings.
	• Select "On" to enable the security function. The user has to enter a password to operate the projector. Please refer to the "User Password" section for details.
	• If "Off" is selected, then the user can turn on the projector without password.
	Timeout(Min.)
	Once "Security" is activated to "On", the administrator can set timeout function.
	• Press ◀ or ▶ to select the timeout interval.
	• The range is from 10 minute to 990 minutes.
	• When the time is up, the projector will prompt the user to enter the password again.
	• The factory default setting of "Timeout(Min.)" is "Off".
	• Once the security function is enabled, the projector will request user to enter password when switch on the projector . Both "User Password" and "Administrator Password" can be accepted for this dialogue.
	User Password
	• Press ▶ to setup or change the "User Password".
	• Press number keys to set your password on the remote control and press "MENU" to confirm.
	• Press ◀ to delete character.
	• Enter the password when you see "Confirm Password" displayed.
	• The password should be between 4 and 8 characters long.
	• If you select "Request password only when plugging the power cord in.", the projector will prompt the user to enter the password every time the power cord is plugged.
	• If you select "Always request password while projector turns on.", the user has to enter the password every time when the projector is turned on.
	Administrator Password
	The "Administrator Password" can be used in both the "Enter Administrator Password" and "Enter Password" dialog boxes.
	• Press ▶ to change the "Administrator Password".
	• The factory default of "Administrator Password" is "1234".
	If you forgot your administrator password, do the following to retrieve the administrator password:
	• An unique 6-digit "Universal Password" which is printed on the Security Card (please check accessory in the box). This unique password is the number which will be accepted by projector anytime no matter what the Administrator Password is.
	• If losing this security card and number, please contact with an Acer service center.

	Lock to user startup screen Default Lock User Startup Screen is "Off". If lock user startup screen is "On", users cannot change startup screen anymore and avoid other users change that arbitrarily. Choose "Off" to unlock startup screen.

Note: Functions vary depending on model definition.

Management

ECO Mode	Choose "On" to dim the projector lamp which will lower power consumption, extend the lamp life and reduce noise. Choose "Off" to return normal mode.
High Altitude	Choose "On" to turn on High Altitude mode. Operate the fans at full speed continuously to allow for proper high altitude cooling of the projector.
Turn Off Mode	Instant Off: Shuts down the projector without fan cooling. Instant Resume: Resumes the system when the Power button is pressed again within 2 minutes.
Timer	**Start (or Stop)** Press to start (or stop) the timer.
	Period Press ◀ or ▶ to adjust the timer period.
	Alarm Select this function to adjust the notification volume when the timer function is enabled and time is up.
	Timer Display Choose "On" or "Off" to which timer mode to display on the screen.
	Location Choose the location of the timer on the screen.
Auto Shutdown	The projector will automatically shutdown when there is no signal input after the allocated time. (default is 120 minutes)
Lamp Hour Elapse	Displays the lamp's elapsed operating time (in hours).
Lamp Reminding	Activate this function to display a reminder to change the lamp 30 hours before its expected end-of-life.
Lamp Hour Reset	Press the ▶ button and choose "Yes" to turn the lamp hour counter to 0 hours.

Note: Functions vary depending on model definition.

Audio
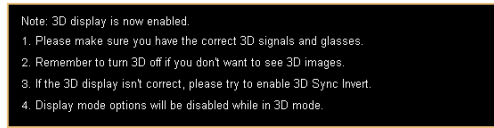

Volume	• Press (◀) to decrease the volume. • Press (▶) to increase the volume.
Mute	• Choose "On" to mute the volume. • Choose "Off" to restore the volume.
Power On/Off Volume	Select this function to adjust the notification volume when turning the projector on/off.
Alarm Volume	Select this function to adjust the volume of any warning notifications.

Note: Functions vary depending on model definition.

3D

3D	Choose "On" to enable DLP 3D function. • On: Choose this item while using DLP 3D glasses, 120Hz 3D capable graphics cards and HQFS format file or DVD with corresponding SW player. • Off: Turn off 3D mode.
24P Boost	Choose "96Hz" or "144Hz" to compatible with 3D glasses.
2D to 3D	2D to 3D Support most of the 2D contents. Choose "On" to enable 2D to 3D function supported by DLP 3D technology. Please use DLP 3D glasses to have correct performance.
	Mode Choose mode of "Photo", "Movie", "Jump-Out" and "User" as your prefered 3D setting.
	Convergence Choose convergrence effect of "Inward", "Middle" and "Outword" as your preferred 3D setting in "User" mode.
	Depth Choose depth effect of "Low", "Middle" and "Strong" as your prefered 3D setting in "User" mode.
3D Format	If the 3D content is not displayed correctly, you can select a 3D format that suits the 3D content you are viewing and obtain the best result.
3D L/R Invert	If you see a discrete or overlapping image while wearing DLP 3D glasses, you may need to execute "Invert" to get best match of left/right image sequence to get the correct image (for DLP 3D).
3D Warning Message	Choose "On" to display the 3D warning message. Note: 3D display is now enabled. 1. Please make sure you have the correct 3D signals and glasses. 2. Remember to turn 3D off if you don't want to see 3D images. 3. If the 3D display isn't correct, please try to enable 3D Sync Invert. 4. Display mode options will be disabled while in 3D mode.

Note: It needs correct settings on graphic card 3D application program for correct 3D display.
Note: The SW players, such as Stereoscopic Player and DDD TriDef Media Player can support 3D format files. You can download these three players on web page below,
 - Stereoscopic Player (Trial):
   http://www.3dtv.at/Downloads/Index_en.aspx
 - DDD TriDef Media Player (Trial):
   http://www.tridef.com/download/TriDef-3-D-Experience-4.0.2.html
Note: "3D L/R Invert" is only available when 3D is enabled.
Note: There has reminder screen if 3D still enable when power on projector. Please adjust setting depended on your purpose.
Note: It will takes much time and some garbage screen might happen while switching between 2D mode, 3D mode and 2D to 3D mode.
Note: Functions vary depending on model definition.

Language

Language	Choose the multilingual OSD menu. Use the ⬆ or ⬇ key to select your preferred menu language. • Press ▶ to confirm the selection.

Appendices

Troubleshooting

If you experience a problem with your Acer projector, refer to the following troubleshooting guide. If the problem persists, please contact your local reseller or service center.

Image Problems and Solutions

#	Problem	Solution
1	No image appears onscreen	• Connected as described in the "Getting Started" section. • Ensure none of the connector pins are bent or broken. • Check if the projector lamp has been securely installed. Please refer to the "Replacing the Lamp" section. • Make sure you have removed the lens cap and the projector is switched on.
2	Partial, scrolling or incorrectly displayed image(For PC (Windows 2000/XP/ Vista/Windows 7/ Windows 8))	• Press "RESYNC" on the remote control or control panel. • For an incorrectly displayed image: • Open "My Computer," open the "Control Panel," and then double-click the "Display" icon. • Select the "Settings" tab. • Verify that your display resolution setting is lower than or equal to UXGA (1600 x 1200). • Click the "Advanced Properties" button. If the problem still appears, change the monitor display you are using and follow the steps below: • Verify that the resolution setting is lower than or equal to UXGA (1600 x 1200). • Click the "Change" button under the "Monitor" tab. • Click "Show all devices". Next, select "Standard monitor types" under the SP box, and choose the resolution mode you need under the "Models" box. • Verify that the resolution setting of the monitor display is lower than or equal to UXGA (1600 x 1200).

3	Partial, scrolling or incorrectly displayed image (for notebooks)	• Press "RESYNC" on the remote control or control panel.
		• For an incorrectly displayed image:
		  • Follow the steps for item 2 (above) to adjust the resolution of your computer.
		  • Press the toggle output settings. Example: [Fn]+[F4], Compaq [Fn]+[F4], Dell [Fn]+[F8], Gateway [Fn]+[F4], IBM [Fn]+[F7], HP [Fn]+[F4], NEC [Fn]+[F3], Toshiba [Fn]+[F5]
		• If you experience difficulty changing resolutions or your monitor freezes, restart all equipment including the projector.

4	The screen of the notebook computer is not displaying your presentation	• If you are using a Microsoft® Windows® based notebook: Some notebook PCs may deactivate their own screens when a second display device is in use. Each has a different way to be reactivated. Refer to your computer's manual for detailed information. • If you are using an Apple® Mac® OS based notebook: In System Preferences, open Display and select Video Mirroring "On".
5	Image is unstable or flickering	• Adjust the "Tracking" to correct it. Refer to the "Image" section for more information. • Change the display color depth settings on your computer.
6	Image has vertical flickering bar	• Use "Frequency" to make an adjustment. Refer to the "Image" section for more information. • Check and reconfigure the display mode of your graphics card to make it compatible with the projector.
7	Image is out of focus	• Make sure the lens cap is removed. • Adjusts the focus ring on the projector lens. • Make sure the projection screen is within the required distance of 4.9 to 33.3 feet (1.5 to 10.1 meters) (WXGA series) /4.9 to 32.6 feet (1.5 to 9.9 meters) (1080P series) / 4.9 to 31.7 feet (1.5 to 9.7 meters) (WUXGA series) from the projector. Refer to the "How to Get a Preferred Image Size by Adjusting Distance and Zoom" section for more information.

8	Image is stretched when displaying a "widescreen" DVD title	When you play a DVD encoded in anamorphic or 16:9 aspect ratio you may need to adjust the following settings: • If you play a 4:3 format DVD title, please change the format to 4:3 in the projector OSD. • If the image is still stretched, you will also need to adjust the aspect ratio. Set up the display format to 16:9 (wide) aspect ratio on your DVD player. • If you play an Letterbox (LBX) format DVD title, please change the format to Letterbox (LBX) in the projector OSD.
9	Image is too small or too large	• Adjust the zoom ring on the top of the projector. • Move the projector closer to or further from the screen. • Press "MENU" on the remote control or on the control panel. Go to "Image --> Aspect Ratio" and try different settings.
10	Image has slanted sides	• If possible, reposition the projector so that it is centered on the screen. • Press the "Keystone △ / ▽ " on the control panel or on the remote control until the sides are vertical. • Press the "Keystone" on the OSD until the sides are vertical.
11	Image is reversed	• Select "Image --> Projection" on the OSD and adjust the projection direction.

Problems with the Projector

#	Condition	Solution
1	The projector stops responding to all controls	If possible, turn off the projector, then unplug the power cord and wait at least 30 seconds before reconnecting power.
2	Lamp burns out or makes a popping sound	When the lamp reaches the end of its useful life, it will burn out and may make a loud popping sound. If this happens, the projector will not turn on until the lamp module has been replaced. To replace the lamp, follow the procedures in the "Replacing the Lamp" section.

OSD Messages

#	Condition	Message Reminder
1	Message	• Fan Fail - the system fan is not working. Fan Fail. Lamp will automatically turn off soon. • Projector Overheated - the projector has exceeded its recommended operating temperature and must be allowed to cool down before it may be used. Please check the following message. Projector overheated, system will turn off automatically soon, please: 1. Check if operation ambient temperature between 5 degree and 40 degree. 2. Check if filter needs to be cleaned. 3. Check if inlet or outlet is blocked. 4. Check if high altitude mode is set when the projector operating at high altitude area. Please also check the dust filters if they are installed. If the dust filter is clogged with dust, please clean it. Please refer to "Cleaning and replacing the dust filter" for details. • Replace the lamp - the lamp is about to reach its maximum lifetime. Prepare to replace it soon. Lamp is approaching the end of its useful life in full power operation. Replacement suggested!

Error (color Wheel fail)	Quick flashing	--	--	V

Cleaning and replacing the dust filters

Cleaning the dust filters

Clean the dust filters after every 1000 hours of use. If they are note cleaned periodically, they can become clogged with dust, preventing proper ventilation. This can cause overheating and damage the projector.
Follow these steps:

1   Turn the projector off. Wait for the Power LED to stop flashing then unplug the power cord.
2   Allow the projector at least 30 mins to cool down.
3   Unplug the corner (Illustration #1)
4   Pull out the dust filter (Illustration #2)
5   To clean the dust filters, use a small vacuum cleaner designed for computers and other office equipment.
6   If the dirt is difficult to remove or the filter is broken, please contact your local dealer or service center to obtain a new filter.

Replacing the Lamp

Use a screwdriver to remove the screw(s) from the cover, and then pull out the lamp.

The projector will detect the lamp life. You will be shown a warning message "Lamp is approaching the end of its useful life in full power operation. Replacement suggested!" When you see this message, change the lamp as soon as possible. Make sure the projector has been cooling down for at least 30 minutes before changing the lamp.

> **Warning:** The lamp compartment is hot! Allow it to cool down before changing the lamp.
To Change the Lamp

1   Turn off the projector by pressing the power button.
2   Allow the projector at least 30 mins to cool down.
3   Disconnect the power cord.
4   Find the "OPEN" button on side of the projector and push it to open the cover. (Illustration #1)
5   Open the cover. (Illustration #2)
6   Remove the two screws that secure the lamp module.(Illustration #3)
7   Pull out the lamp module by force. (Illustration #4)

To replace the lamp module, reverse the previous step.

> **Warning:** To reduce the risk of personal injury, do not drop the lamp module or touch the lamp bulb. The bulb may shatter and cause injury if it is dropped.

Ceiling Mount Installation

If you wish to install the projector using a ceiling mount, please refer to the steps below:

1   Drill four holes into a solid, structurally sound part of the ceiling, and secure the mount base.
Note: Screws are not included. Please obtain the appropriate screws for your type of ceiling.

2   Secure the ceiling rod using the appropriate type of four-cylinder screws.

Short Rod

Ceiling Mount Base
- Attach to ceiling

Long Rod

Extension Rod
